FISCAL NOTE. -- Pursuant to Legislative Law, Section 50:

Projected contributions include future new hires that may be impacted. For Fiscal Year 2051 and beyond, the expected increase in normal cost as a level percent of pay for impacted new entrants is approximately 0.03% for NYCERS, 0.09% for POLICE, and 0.15% for FIRE. Costs for potential future accidental death reclassifications are not included above.

The initial increase in employer contributions will be allocated to New York City.

PRESENT VALUE OF BENEFITS: The Present Value of Benefits is the discounted expected value of benefits paid to current members if all assumptions are met, including future service accrual and pay increases. Future new hires are not included in this present value.

INITIAL INCREASE (DECREASE) IN ACTUARIAL PRESENT VALUES
as of June 30, 2024 (\$ in Millions)

Present Value (PV)	NYCERS	POLICE	FIRE
(1) PV of Employer Contributions:	6.5	143.3	44.8

Total PV of Benefits (1) + (2):	6.5	143.3	44.8

UNFUNDED ACCRUED LIABILITY (UAL): Actuarial Accrued Liabilities are the portion of the Present Value of Benefits allocated to past service. Changes in UAL for active members were amortized over the expected remaining working lifetime of those impacted using level dollar payments. UAL attributable to inactive members was recognized in the first year.

Additional One-time Payment:	0.0 M	88.8 M	0.0 M

CENSUS DATA: The estimates presented herein are based on preliminary census data collected as of June 30, 2024. The census data for the impacted population is summarized below.

	NYCERS	POLICE	FIRE
Active Members			
- Number Count:	18,413	33,803	10,691
- Average Age:	41.9	37.5	40.7
- Average Service:	11.3	11.1	13.7
- Average Salary:	108,600	134,900	143,400
Receiving Members			
- Number Count:	0	27	0
- Average Age of Youngest Child:	N/A	21.6	N/A

IMPACT ON SURVIVOR BENEFITS: The accidental death benefits payable to surviving beneficiaries of NYCERS, POLICE, and FIRE members who were employed in certain uniformed positions are made up of accidental death benefits and, if eligible, Special Accidental Death Benefits (SADB) under General Municipal Law section 208-f, totaling approximately 100% of the member's salary and is assumed to increase by 3% each year.

Currently, SADB is payable to surviving spouses for their lifetime, then to children until age 18, or age 23 if a student, and then to surviving parents for their lifetime. If there are no beneficiaries in a class, benefits are paid to each successive class. In the event that there is more than one eligible beneficiary in a class (e.g., multiple children), benefits are divided among members of that class.

Under the proposed legislation, for member deaths on or after the effective date, SADB would be payable to surviving spouses for their lifetime, then to any children who were under age 25 at the time of death for their lifetime, and then to surviving parents for their lifetime.

For member deaths prior to the effective date, lifetime SADB benefits would be extended to surviving children of POLICE members who were under age 21 at the time of death, if they are under age 30 upon application, and provided that no spouse or parent is currently in receipt of the SADB benefit. To the extent that benefits would be reduced for other beneficiaries, consent from affected beneficiaries would be required before such benefits would be paid.

ASSUMPTIONS AND METHODS: The estimates presented herein have been calculated based on the Revised 2021 Actuarial Assumptions and Methods of the impacted retirement systems. In addition:

- * Upon accidental death, 50% of active members are assumed to be survived by a spouse and children, 25% are assumed to be survived by parents and children with no spouse, and the remaining 25% are assumed to have no children.

- * For purposes of estimating the demographics of surviving children, members are assumed to have their first child at age 25, second child at age 30, and third child at age 35.

- * For purposes of estimating the demographics of surviving parents, parents are assumed to be 30 years older than the member at time of death.

- * 50% of deceased members with child beneficiaries currently in-receipt are assumed to have parents who are still alive.

- * New entrants were assumed to replace exiting members so that total payroll increases by 3% each year for impacted groups. New entrant demographics were developed based on data for recent new hires and actuarial judgement.

RISK AND UNCERTAINTY: The costs presented in this Fiscal Note depend highly on the actuarial assumptions, methods, and models used, demographics of the impacted population, and other factors such as investment, contribution, and other risks. If actual experience deviates from actuarial assumptions, the actual costs could differ from those presented herein. Quantifying these risks is beyond the scope of this Fiscal Note.

This Fiscal Note is intended to measure pension-related impacts and does not include other potential costs (e.g., administrative and Other Postemployment Benefits). This Fiscal Note does not reflect any chapter laws that may have been enacted during the current legislative session.

STATEMENT OF ACTUARIAL OPINION: Marek Tyszkiewicz and Gregory Zelikovsky are members of the Society of Actuaries and the American Academy of Actuaries. We are members of NYCERS, but do not believe it impairs our objectivity, and we meet the Qualification Standards of the American Academy of Actuaries to render the actuarial opinion contained herein. To the best of our knowledge, the results contained herein have been prepared in accordance with generally accepted actuarial principles and procedures and with the Actuarial Standards of Practice issued by the Actuarial Standards Board.
