

# East River Ferry Text Amendment

## Problems with existing regulations

- Limitation on size of ferry at 3 of the existing dock locations; authorizations required in others
- Parking is required for ferry docks today. Most users walk to the station and current landings provide no parking
- No site design standards

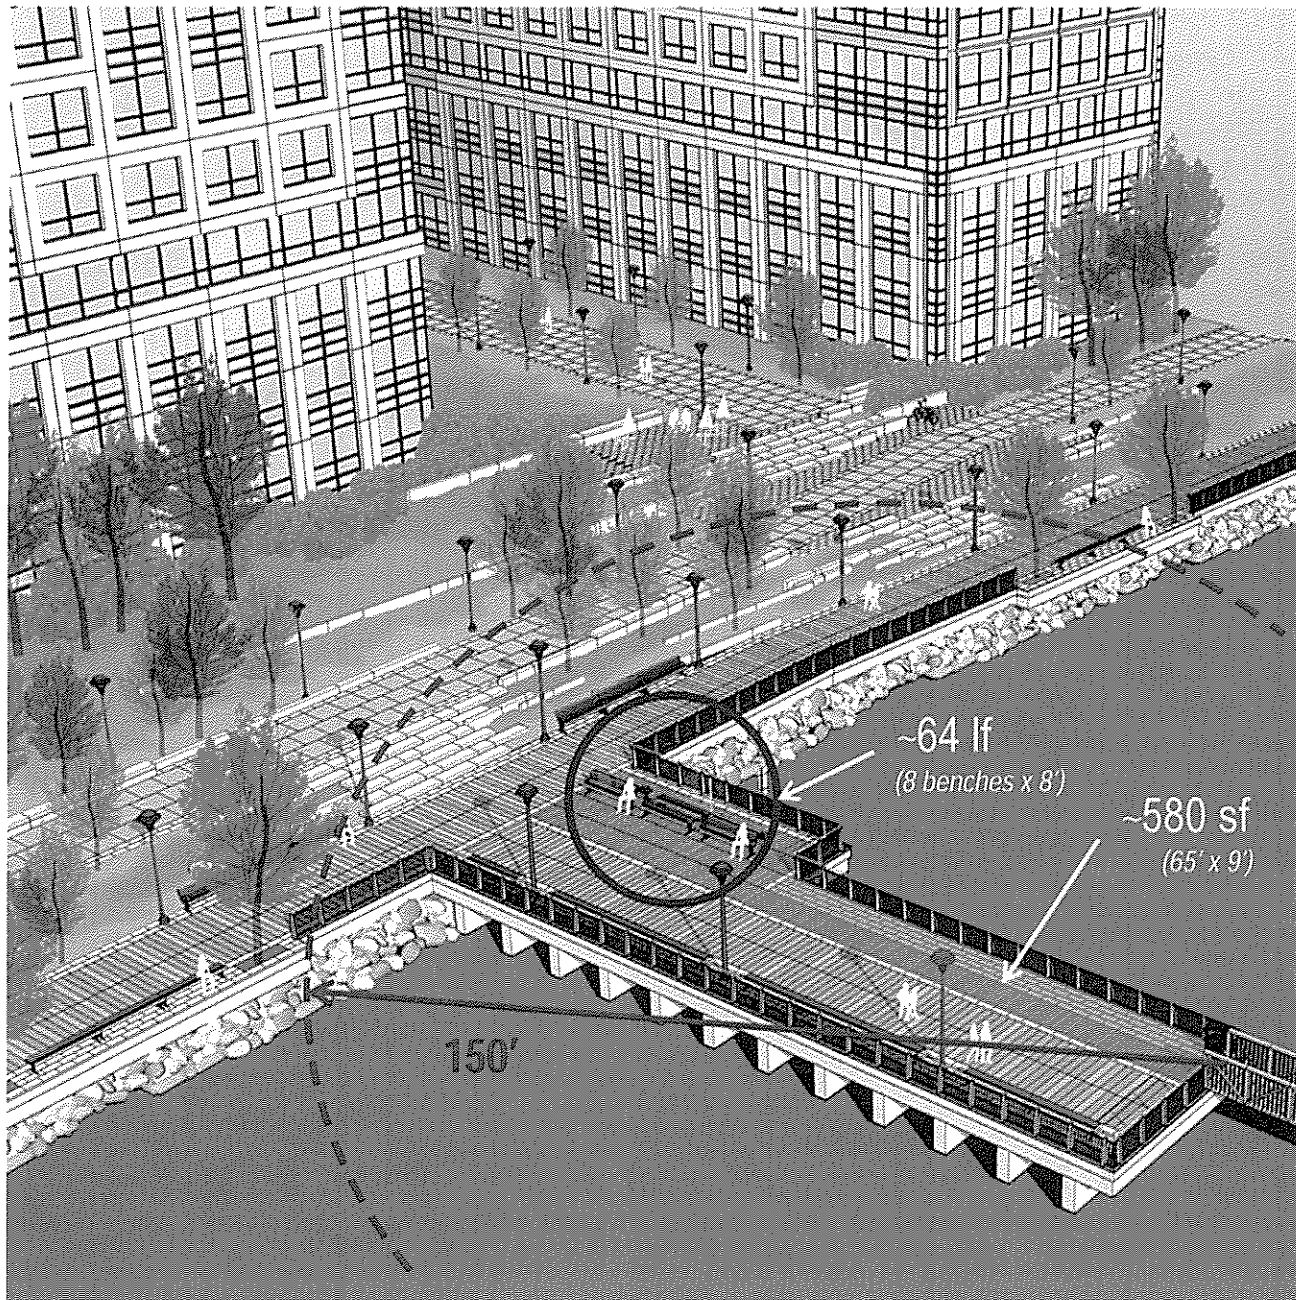

## Proposed modifications

- Increase Permitted Vessel Capacity:
  - Create a certification process to allow vessels up to 399 passengers to dock in residential, commercial and manufacturing districts of Community District 1 in Brooklyn
  - All other ferries in BK CD1 would also be subject to certification
- Eliminate parking and drop-off requirements
- Establish site design standards which require and permit certain amenities to ensure smooth pedestrian connections to publicly accessible spaces

## Required Amenities : Passenger Queuing Space

**EAST  
RIVER  
FERRY**

Through certification, docking facilities would require the following amenities:

- 4sf of queuing area for 40% of vessel's capacity

*For example, for a 399 passenger vessel :*

*40% of 399 passengers  
= ~160 passengers*

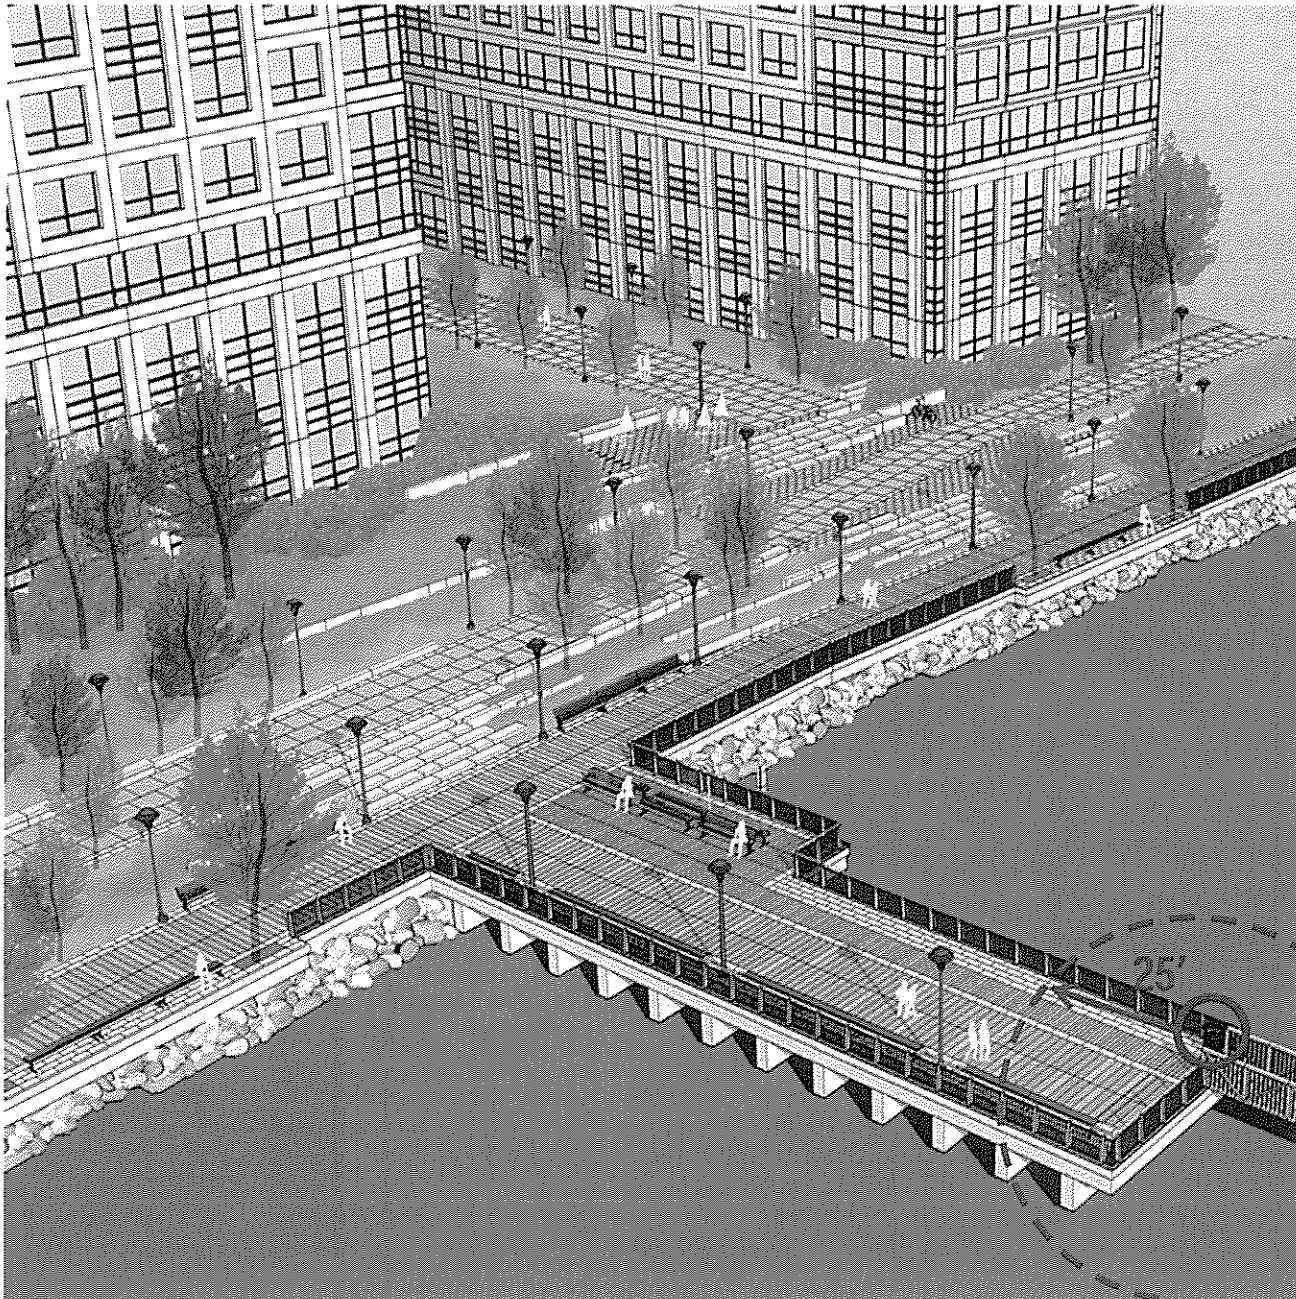

*160 x 4 sf / passenger =  
640 sf of queuing area*

- 10-50% of this should be provided as seating  
*(1linear sf = 1sf of queuing space)*
- This must be provided within 150ft of the end of the gangway.

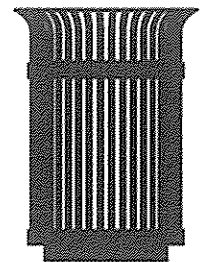

## Required Amenities : Trash receptacle

**EAST  
RIVER  
FERRY**

Through certification, docking facilities would require the following amenities:

- 1 trash receptacle
- This should be provided within 25ft of the end of the gangway.
