

**NEW YORK CITY DEPARTMENT OF EDUCATION**

**NEW YORK CITY SCHOOL CONSTRUCTION AUTHORITY**

**QUARTERLY SCHEDULE AND BUDGET REPORT**

**For the Quarter Ending June 30, 2017**

August 1, 2017

Lorraine Grillo  
President & CEO  
lgrillo@nycsca.org

Ms. Latonia McKinney  
Director – Finance Division  
The Council of the City of New York  
250 Broadway 15<sup>th</sup> Floor  
New York, NY 10007

Dear Ms. McKinney:

Attached is the Quarterly Schedule and Budget Report for capital projects at the Department of Education (DOE).

The report includes approximately 4,321 capital projects being managed by the School Construction Authority (SCA), DOE's Division of School Facilities Skilled Trades unit, Department of Citywide Administrative Services, Department of Education's Division of Instructional and Information Technology and Trust for Public Land.

- The report is sorted by Council District. Within each Council District, the report is sorted by Building ID.
- Each project identifies the organization responsible for managing the project, such as "SCA" or "DIIT," as well as the relevant data for that project. The Definitions section contains the full listing of the managing organizations and explanations of the various terms used in the report.
- The report provides explanations for projects in which the final cost estimate exceeds the project budget by 10% or more.
- The report provides explanations for projects in which the current phase completion date exceeds the planned completion date by 60 days or more.

- For some of the projects that are managed outside of the SCA (such as projects managed by the DOE's Division of School Facilities Skilled Trades unit), this report contains actual completion dates and actual costs. Some of these projects do not record planned completion dates, therefore, the report shows no schedule variances. In addition, some of these projects will not show individual budgets. For example, while the Division of School Facilities Skilled Trades has an annual, citywide budget for the fiscal year, the individual projects are not budgeted at the beginning of the year.
- Similarly, some categories of SCA-managed projects, such as Emergency Response or Industrial and Environmental Hygiene, do not have planned dates or budgeted costs. These types of projects are performed in response to structural or environmental emergencies and, therefore, will only have actual dates and costs.

Each Council Member will receive a copy of the report electronically in a PDF format as requested by your office.

If you have any questions or need additional information, please contact Marianne Egri at 718-472-8012.

Sincerely,

  
Lorraine Grillo  
President & CEO

Nnennaya Okezie, Executive Director, Intergovernmental Affairs

**New York City Department of Education  
New York City School Construction Authority  
Quarterly Schedule and Budget Report  
Quarter Ending June 30, 2017**

## **OVERVIEW OF REPORT AND DEFINITIONS OF INFORMATION PROVIDED**

### **OVERVIEW**

The New York City Department of Education and School Construction Authority Quarterly Schedule and Budget Report (the Report) contains school capital projects for which funding is appropriated and/or which were completed in the immediately preceding fiscal quarter. The Report is organized by City Council District. Within each Council District, the projects are presented by building and school order based on the Department of Education (DOE) building identification code (Building ID data field). The projects are then grouped by the organization managing the capital work (Managing Organization). These organizations are: NYC School Construction Authority (SCA), NYC Department of Citywide Administrative Services (DCAS)/New York Power Authority (NYPA), DOE Division of Instructional and Information Technology (DIIT), DOE Skilled Trades, DOE Lead Paint, Trust for Public Land. The Report provides schedule, financial and variance information. In accordance with general financial reporting practices, if a schedule or budget variance appears in parentheses, the project is late or is over budget. The Report provides explanations for projects in which the actual completion date exceeds the planned completion date by 60 days or more and for projects in which the final cost estimate exceeds the project budget by 10% or more.

### **DEFINITIONS OF INFORMATION PROVIDED**

**Type** – Indicates both the Managing Organization and the categories of projects. The type of project dictates the schedule and financial information that is provided in this report. The Managing Organizations, types of projects and data provided are described in detail at the end of this document (Type of Project-Detailed Descriptions).

**Project Description** - Provides a general description of the work performed for each project.

**Phase** – Indicates the phase of the project. The following phases, when appropriate for each project, are listed: Scope, Design, Construction, Construction Management (CM), Furniture and Equipment (F&E), Art, Industrial and Environmental Hygiene (IEH), In-Bid, and Purchase and Install (Purch & Install). No projects will have all of the phases

listed above and many projects have only one phase. The phases reported for each project are those required for the project type. Specific phase information is described in the Type of Project-Detailed Descriptions section.

**Status** – Indicates whether the phase is in progress, complete or not started. If the phase is not started, “PNS” appears in the data field.

**DSF Number** - This is the unique identifier for each project that is funded by the Capital Plan. Many projects in the Report have more than one DSF number, which indicates the project is comprised of more than one Capital Plan project.

### **SCHEDULE DATA**

**Actual Phase Start** – Date that project phase actually began. If the phase has not yet started, “PNS” appears in this field.

**Planned Phase End** – Date that project phase is planned to end. Planned end dates are developed and entered when a phase starts. If the phase has not started “PNS” appears in this field. If the project type is Emergency Response or Industrial & Environmental Hygiene, the project does not have a standard scheduled duration and therefore does not have planned end dates. For these projects a “Category Note” appears in this field.

For the construction phase, the planned phase end indicates the date the project is to be substantially complete. A project is substantially complete when the building can be safely occupied and used for its intended purpose.

**Actual Phase End** – Date that project phase actually ended. For the construction phase, this indicates the date the project is substantially complete.

**Variance (For Phase End)** – Provides variance between Planned Phase End and Actual End. If the project phase was completed late, the variance appears in parentheses. An explanation is provided if the actual phase completion date exceeds the plan phase completion date by 60 days or more. If the Plan Phase End column is “PNS”, then the variance will be “PNS”. If a “Category Note” is provided in the planned end phase, the same “Category Note” is provided in the variance field.

## **FINANCIAL DATA**

**OMB CP Authorized Amount** - Represents the total Certificate to Proceed (CP) amount currently appropriated by OMB to the project or group of projects. CPs can be project specific or lump sum by program. The CP is the amount that can be obligated at that point in time. Accordingly, CP funding may be less or greater than the other financial data fields provided due to timing differences. The CP may be zero if funds have not yet been allocated to the project. (More detailed information is provided in the Type of Project-Detailed Descriptions section).

SCA Capacity Projects –The project CP is requested during the scope phase when preliminary estimates are available. The CP is adjusted upon award of the construction contract to reflect the actual project cost. If the project is being designed and managed by SCA personnel, the appropriation for the in-house design and management is included in the SCA Operating Budget CP, but is reflected in this column.

SCA CIP Projects – The OMB CP authorized amount may be included in several CPs. If the project is being designed and/or managed by SCA personnel rather than consultants, the costs associated with those services are included in the SCA Operating Budget CP. The appropriation column includes costs of SCA personnel working on the project as those costs are incurred, but does not include projections of future costs. Accordingly, the CP column may be less than the Project Budget column because the project budget column includes all current and projected future costs associated with the project budget.

SCA Citywide Projects – The OMB CP is funded on a lump sum basis rather than a project specific basis. The CP is allocated to the individual projects as they are identified.

Managing Organizations – If the OMB CP is project specific, it is provided. If it is funded as a lump sum, then the total CP amount for the program is provided.

**Project Budget** – Represents the budget for the project.

SCA Capacity Projects and CIP Projects – For projects in Scope and Design, the total project budget is based on the most recent construction estimate. For projects in construction, the total project budget is based on the construction award. For CIP projects, if there is no construction estimate, then the project is not yet budgeted and “PNB” appears in the Project Budget Field. Project budgets are developed during the Scope and/or Design phases.

SCA Reso “A” Projects – The project budget is equal to the Reso “A” allocation for the project.

SCA Citywide Projects – These projects are funded on a lump sum basis. For the majority of Citywide projects, primarily Emergency Lighting Projects, project budgets are provided. For Citywide projects, if there is no construction estimate, then the project is not yet budgeted and “PNB” appears in the Project Budget Field. For Emergency Response and Industrial & Environmental Hygiene projects, there are no project budgets since these projects are funded as emergencies and environmental conditions arise. The project budget data field contains a “Category Note” for these projects.

Managing Organizations – If the projects are funded by project specific CPs, the project budgets are provided. If the funding is a lump sum for an entire program, then individual project budgets are not provided.

**Final Estimate of Actual Costs Through End of Phase** – Represents the total anticipated final cost of project, which includes actual obligations and projected costs to complete. (More detailed information is provided in the Type of Project-Detailed Description section). If the final estimate is not provided, a “Category Note” is provided. For CIP and Citywide projects, if there is no construction estimate, then the project is not yet budgeted and “PNB” appears in the Project Budget Field. The final estimate reflects only costs incurred and not the full project estimate.

SCA – Some Citywide categories such as Emergency Response and Industrial & Environmental Hygiene projects do not include projected costs.

Managing Organizations – Data is provided as available.

**Total Phase Actual Spending** – Represents the total amount paid on the project.

**\$ Variance Project Budget to Final Estimate** – Represents the dollar variance between the Project Budget and the Final Estimate. If the number appears in parentheses, the Final Estimate exceeds the Budget. If the Project Budget or Final Estimate field contains a “Category Note”, then the variance also contains the same “Category Note”. For CIP and Citywide projects, if there is no construction estimate, then the project is not yet budgeted and “PNB” appears in the Project Budget Field, the final estimate reflects only costs incurred, and the variance is “PNB”.

**% Variance Final Estimate Amount to Project Budget** – Represents the percent variance of the final estimate to the project budget. If this number appears in parentheses, the total final estimate exceeds the project budget by the stated percent. An explanation is provided if the final estimate exceeds the project budget by 10% or greater. If the Project Budget or Final Estimate field contains a “Category Note”, then the variance also contains the same “Category Note”. If the project budget is “PNB”, this field is “PNB”.

## **TYPE OF PROJECT-DETAILED DESCRIPTIONS**

**SCA Capacity** – Projects that result in new seat creation may be new schools or additions to existing schools. For schedule information, actual start and end dates are provided for Scope, Design and Construction and planned completion dates are provided for Construction. Financial data is provided for all data fields.

**SCA Capital Improvement Projects (CIP)** – Major renovations and repair projects such as roof and window replacements, and masonry work. City Council Reso “A” projects are included in this category if they involve construction. For schedule information, actual start and end dates are provided for scope, design and construction, and planned completion dates are provided for construction. Planned completion dates are provided for Scope and Design if the project was in the Scope or Design In-Progress phase/status as of the quarter ending September 30, 2003. Financial data is provided for all data fields.

**SCA Leases** – These projects involve the construction of leased sites resulting in new seat creation. The funding is Borough specific and is allocated to projects as needs and sites are identified. Lease schedule data includes actual construction start and end dates and planned construction completion dates if the project is in progress. Actual Scope and Design start and end dates are provided if available. Financial data is provided for all data fields.

**SCA Citywide Projects** – These are categories of projects that represent a program and are funded on a Citywide lump sum basis. The specific programs in this report are: Emergency Lighting, Transportables, Emergency Response, and Industrial & Environmental Hygiene (typically Asbestos Abatement). The financial information is provided for all data fields except some Emergency Lighting projects and all Emergency Response, and Industrial & Environmental Hygiene Projects. For Emergency Response and Industrial & Environmental Hygiene projects, there are no project budgets since these projects are funded as emergencies and environmental conditions arise. The project budget data field contains a “Category Note” for these projects.

Emergency Lighting Projects – These are primarily projects required to comply with Local Law 41/16. Emergency Lighting project schedule information includes actual start and end dates for scope, design and construction and planned completion dates for construction. Planned completion dates are provided for Scope and Design. The financial information provided includes the lump sum CP, project budget, final estimate, and actual spending.

Emergency Response Projects – These projects are performed as emergencies are identified. Generally the emergency must be remediated immediately and there is no formal scope or design phase. Accordingly, the only phase reported is Construction. The actual construction start and end dates are provided. The planned construction completion date is not provided since these projects are emergencies and do not have standard scheduled durations. Emergency Response financial information includes the CP, final estimate, and actual spending. The final estimate does not include projections to complete the project. Project budget is not provided since the projects are not budgeted.

Transportable Classroom Units (TCUs) – Transportable Classroom Units are funded on a Citywide lump sum basis and are allocated to schools as required. TCU schedule data includes actual scope, design and construction dates and planned construction completion dates. All financial data fields are provided.

Industrial & Environmental Hygiene (IEH) – These projects are primarily asbestos projects performed on an as needed basis. The work items are generated from requests by custodians. For IEH schedule data, the actual construction start date and completion dates are provided. Like Emergency projects, these projects are responses to identified environmental conditions and do not have formal scope and design phases. The only phase reported is Construction. For IEH financial data, CP and final estimate data are provided. Project budget data is not provided as these projects are funded as needed.

**Furniture and Equipment (F&E)** – These projects involve purchasing furniture and equipment and do not require scope, design or construction. The information pertaining to these projects is provided in the “F&E” phase and only that phase appears in the Report. For schedule data, actual start and planned and actual completion dates are provided. For F&E financial information, all data is provided. Most of the projects in this category are City Council Reso “A” funded.

## **Managing Organizations**

**DIIT** – Performs two major categories of projects: Project Connect, and City Council Reso “A” Technology Projects. Only the “Purch and Install” phase appears in the report since technology projects do not involve scope, design and construction. For schedule information, actual start and end dates are provided and planned completion dates are provided if the project is in progress. The schedule data fields for projects not started are "PNS". For financial data, the funding is on a lump sum basis and the costs per school are dependent on survey results. Each CP reflects funding for an entire multi-school program. This program has additional State, Federal and private funding sources which are not included in this column. Final estimates and actual spending are provided when available.

DIIT - Project Connect involves purchase and installation of technology on projects such as infrastructure cabling, equipment and integration, wireless classroom integration/installation, retrofit and data and voice cabling, and internet video instruction servers (IVIS). There are two CPs of \$97.86 million and \$10 million.

DIIT - Reso “A” Projects involve purchase and installation of technology and fall under the management of DIIT.

DIIT – Private Branch Exchange (PBX) Telephone Systems facilitate the ability to support telephones in every classroom within a school building and fall under the management of DIIT. The CP for these projects is based on a lump sum amount of \$31.1 million.

**DOE Skilled Trades** – Performs various renovation projects including room conversions. For schedule data, actual start and end dates are provided. Scope and Design are only required when the project requires a building permit. Planned end dates are provided for Scope and Design. If the project does not require a building permit, the only phase provided is Construction. For financial data, the CP is provided. Final estimate is generally not provided until the project is complete. Actual spending is provided when available.

**DOE Lead** – Performs Lead Paint Abatement. For schedule data, construction actual start and end dates are provided. Planned construction completion dates are not provided. Scope and Design are not required. Accordingly, the phase provided is construction. For financial data, there is one lump sum CP for \$4 million. Project budget data is not provided since the funding is lump sum. The final estimate and total actual spending are provided.

**DOE Reso “A”** – The specific City Council Reso “A” funded projects being constructed by DOE. For schedule data, actual construction start and end dates are provided. For financial data, the CP is provided. The project budget, final estimate and actual spending are provided as a project total against the construction phase.

**DOE Managed PreK** – These are Pre-K projects that are performed by the DOE. Scope and design schedules are combined into a single scope phase. The actual construction start and end dates are provided. Financial information includes the CP, final estimate, and actual spending. Financial data is provided when available.

**Trust for Public Land** – This organization constructs new playgrounds. For schedule data, actual scope, design and construction start dates and planned and actual completion dates are provided. For financial data, the CP, project budget, final estimate and actual spending are provided for all data fields. The CP represents the City-funded amount. The project budget represents the full project cost including other funding sources.

Redesigning the network by engineers due to a discontinued key component of the school infrastructure resulted in additional construction time.													
<b>Category Note:</b>						\$97,857,026		0		DIIT		DIIT	
DIIT (DOE Division of Instructional and Information Technology) - Project Connect involves purchase and installation of technology on projects such as infrastructure cabling, equipment and integration, wireless classroom integration/installation, retrofit and data and voice cabling, and internet video instruction servers (IVIS). Only the Purchase and Install phase appears in the Report since technology projects do not involve scope, design and construction. For schedule information, actual start and end dates are provided and planned completion dates are provided. For financial data, the funding is on a lump sum basis and the costs per school are dependent on survey results. Each CP reflects funding for an entire multi-school program. There are two CPs of \$97.86 million and \$10.0 million. This program has additional State, Federal and private funding sources which are not included in this column. Final estimates and actual spending are provided when available. Financial data is "DIIT", if data is not provided.

<p>Redesigning the network by engineers due to a discontinued key component of the school infrastructure resulted in additional construction time.</p> <p><b>Category Note:</b> DIIT (DOE Division of Instructional and Information Technology) - Project Connect involves purchase and installation of technology on projects such as infrastructure cabling, equipment and integration, wireless classroom integration/installation, retrofit and data and voice cabling, and internet video instruction servers (IVIS). Only the Purchase and Install phase appears in the Report since technology projects do not involve scope, design and construction. For schedule information, actual start and end dates are provided and planned completion dates are provided. For financial data, the funding is on a lump sum basis and the costs per school are dependent on survey results. Each CP reflects funding for an entire multi-school program. There are two CPs of \$97.86 million and \$10.0 million. This program has additional State, Federal and private funding sources which are not included in this column. Final estimates and actual spending are provided when available. Financial data is "DIIT", if data is not provided.</p>

**Quarterly Schedule and Budget Report**  
**Quarter Ending June 30, 2017**

						Schedule Data				Financial Data		
						Start	End			Project Budget	Final Estimate of Actual Costs Through End of Phase	Total Phase Actual Spending
Building ID	School	Type	Project description	Phase	Status	Actual Phase	Planned Phase	Actual Phase	Variance Early/ (Late)			
M188	P.S. 188 - MANHATTAN	SCA Emergency Response	EMERGENCY STABILIZATION	Construction	In-Progress	02/17/2015	EMER		EMER	EMER	\$466,280	\$466,280
DSF: 0000033812						<b>Total</b>			EMER	\$466,280	\$466,280	
<b>Explanations:</b>						<b>OMB CP Authorized Amount</b>	\$466,280	<b>\$ Variance, Project Budget to Final Estimate</b>	EMER	<b>% Final Estimate Amount to Project Budget Under/( Over)</b>	EMER	
<b>Category Note:</b> EMER (Emergency Response) - These projects are performed as emergencies are identified. Generally the emergency must be remediated immediately and there is no formal scope or design phase. Accordingly, the only phase reported is Construction. The actual construction start and end dates are provided. The planned construction completion date is "EMER" since these projects are emergencies and do not have standard scheduled durations. Emergency Response financial information includes the CP, final estimate, and actual spending. The final estimate is "EMER" until an initial estimate is obtained. The final estimate does not include projections to complete the project. Project budget is "EMER" since the projects are emergencies and are not budgeted.												
M188	P.S. 188 - MANHATTAN	DOE - Lead Paint	LEAD PAINT ABATEMENT	Construction	In-Progress	03/01/2017	DOEL		DOEL	DOEL	\$800	\$0
DSF:						<b>Total</b>			DOEL	\$800	\$0	
<b>Explanations:</b>						<b>OMB CP Authorized Amount</b>	\$4,000,000	<b>\$ Variance, Project Budget to Final Estimate</b>	DOEL	<b>% Final Estimate Amount to Project Budget Under/( Over)</b>	DOEL	
<b>Category Note:</b> DOEL - DOE Lead - Performs Lead Paint Abatement. For schedule data, construction actual start and end dates are provided. Planned construction completion dates are "DOEL". Scope and Design are not required. Accordingly, the phase provided is construction. There are two CPs for these projects, based on a combined amount of \$4.0 million. Project budget data is "DOEL" since the funding is lump sum. The final estimate and total actual spending are provided.

Like Emergency projects, these projects are responses to identified environmental conditions and do not have formal scope and design phases. The only phase reported is Construction. For IEH financial data, CP and final estimate data are provided. Project budget data is "IEH" as these projects, like Emergency projects, are responses to environmental conditions and are funded as needed.												
M017	P.P.A.S. - MANHATTAN	Fast Track Projects	FY13 RESO A ROOM CONVERSIONS / PART	Construction	In-Progress	10/26/2016	FTK		FTK	FTK	\$1,147,477	\$69,414
DSF: 0000754683												
<b>Total</b>										FTK	\$1,147,477	\$69,414
<b>Explanations:</b>						<b>OMB CP Authorized Amount</b>	\$600,000	<b>\$ Variance, Project Budget to Final Estimate</b>	FTK	<b>% Final Estimate Amount to Project Budget Under/( Over)</b>	FTK	FTK
<b>Category Note:</b> Fast Track (Various Expedited Projects) - These projects are expedited when identified. In some cases there may not be a formal scope or design phase. Accordingly, the only phase reported is Construction. The actual construction start and end dates are provided. The planned construction completion date is "FTK" since these projects are expedited and do not have standard scheduled durations. Financial information includes the CP, final estimate, and actual spending. The final estimate does not include projections to complete the project. Project budget is "FTK" since the projects are expedited and are not budgeted.

Fast Track (Various Expedited Projects) - These projects are expedited when identified. In some cases there may not be a formal scope or design phase. Accordingly, the only phase reported is Construction. The actual construction start and end dates are provided. The planned construction completion date is "FTK" since these projects are expedited and do not have standard scheduled durations. Financial information includes the CP, final estimate, and actual spending. The final estimate does not include projections to complete the project. Project budget is "FTK" since the projects are expedited and are not budgeted.

Redesigning the network by engineers due to a discontinued key component of the school infrastructure resulted in additional construction time.												
<b>Category Note:</b> DIIT (DOE Division of Instructional and Information Technology) - Project Connect involves purchase and installation of technology on projects such as infrastructure cabling, equipment and integration, wireless classroom integration/installation, retrofit and data and voice cabling, and internet video instruction servers (IVIS). Only the Purchase and Install phase appears in the Report since technology projects do not involve scope, design and construction. For schedule information, actual start and end dates are provided and planned completion dates are provided. For financial data, the funding is on a lump sum basis and the costs per school are dependent on survey results. Each CP reflects funding for an entire multi-school program. There are two CPs of \$97.86 million and \$10.0 million. This program has additional State, Federal and private funding sources which are not included in this column. Final estimates and actual spending are provided when available. Financial data is "DIIT", if data is not provided.

Redesigning the network by engineers due to a discontinued key component of the school infrastructure resulted in additional construction time.												
<b>Category Note:</b>												
DIIT (DOE Division of Instructional and Information Technology) - Project Connect involves purchase and installation of technology on projects such as infrastructure cabling, equipment and integration, wireless classroom integration/installation, retrofit and data and voice cabling, and internet video instruction servers (IVIS). Only the Purchase and Install phase appears in the Report since technology projects do not involve scope, design and construction. For schedule information, actual start and end dates are provided and planned completion dates are provided. For financial data, the funding is on a lump sum basis and the costs per school are dependent on survey results. Each CP reflects funding for an entire multi-school program. There are two CPs of \$97.86 million and \$10.0 million. This program has additional State, Federal and private funding sources which are not included in this column. Final estimates and actual spending are provided when available. Financial data is "DIIT", if data is not provided.

<b>Category Note:</b> IEH (Industrial & Environmental Hygiene ) - These projects are environmental abatement projects performed on an as-needed basis. The work items are typically in response to requests by custodians. For IEH schedule data, the actual construction start date and completion dates are provided. Like Emergency projects, these projects are responses to identified environmental conditions and do not have formal scope and design phases. The only phase reported is Construction. For IEH financial data, CP and final estimate data are provided. Project budget data is "IEH" as these projects, like Emergency projects, are responses to environmental conditions and are funded as needed.												
M083	THE BILINGUAL BICULTURAL SCHOO	DIIT - RESOA	FY17 RESO A TECHNOLOGY	Purch & Install	In-Progress	05/19/2017	01/15/2018	0	\$100,000	\$99,249	\$99,249

Redesigning the network by engineers due to a discontinued key component of the school infrastructure resulted in additional construction time.												
<b>Category Note:</b> DIIT (DOE Division of Instructional and Information Technology) - Project Connect involves purchase and installation of technology on projects such as infrastructure cabling, equipment and integration, wireless classroom integration/installation, retrofit and data and voice cabling, and internet video instruction servers (IVIS). Only the Purchase and Install phase appears in the Report since technology projects do not involve scope, design and construction. For schedule information, actual start and end dates are provided and planned completion dates are provided. For financial data, the funding is on a lump sum basis and the costs per school are dependent on survey results. Each CP reflects funding for an entire multi-school program. There are two CPs of \$97.86 million and \$10.0 million. This program has additional State, Federal and private funding sources which are not included in this column. Final estimates and actual spending are provided when available. Financial data is "DIIT", if data is not provided.

Redesigning the network by engineers due to a discontinued key component of the school infrastructure resulted in additional construction time.												
<b>Category Note:</b> DIIT (DOE Division of Instructional and Information Technology) - Project Connect involves purchase and installation of technology on projects such as infrastructure cabling, equipment and integration, wireless classroom integration/installation, retrofit and data and voice cabling, and internet video instruction servers (IVIS). Only the Purchase and Install phase appears in the Report since technology projects do not involve scope, design and construction. For schedule information, actual start and end dates are provided and planned completion dates are provided. For financial data, the funding is on a lump sum basis and the costs per school are dependent on survey results. Each CP reflects funding for an entire multi-school program. There are two CPs of \$97.86 million and \$10.0 million. This program has additional State, Federal and private funding sources which are not included in this column. Final estimates and actual spending are provided when available. Financial data is "DIIT", if data is not provided.

For IEH financial data, CP and final estimate data are provided. Project budget data is "IEH" as these projects, like Emergency projects, are responses to environmental conditions and are funded as needed.												
M092	P.S. 92 - MANHATTAN	Fast Track Projects	EMERGENCY STABILIZATION	Construction	In-Progress	09/02/2014	FTK		FTK	FTK	\$356,942	\$356,942
DSF: 0000031832						<b>Total</b>			FTK	\$356,942	\$356,942	
<b>Explanations:</b>						<b>OMB CP Authorized Amount</b>	\$356,942	<b>\$ Variance, Project Budget to Final Estimate</b>	FTK	<b>% Final Estimate Amount to Project Budget Under/( Over)</b>	FTK	
<b>Category Note:</b> Fast Track (Various Expedited Projects) - These projects are expedited when identified. In some cases there may not be a formal scope or design phase. Accordingly, the only phase reported is Construction. The actual construction start and end dates are provided. The planned construction completion date is "FTK" since these projects are expedited and do not have standard scheduled durations. Financial information includes the CP, final estimate, and actual spending. The final estimate does not include projections to complete the project. Project budget is "FTK" since the projects are expedited and are not budgeted.

<p>Redesigning the network by engineers due to a discontinued key component of the school infrastructure resulted in additional construction time.</p> <p><b>Category Note:</b> DIIT (DOE Division of Instructional and Information Technology) - Project Connect involves purchase and installation of technology on projects such as infrastructure cabling, equipment and integration, wireless classroom integration/installation, retrofit and data and voice cabling, and internet video instruction servers (IVIS). Only the Purchase and Install phase appears in the Report since technology projects do not involve scope, design and construction. For schedule information, actual start and end dates are provided and planned completion dates are provided. For financial data, the funding is on a lump sum basis and the costs per school are dependent on survey results. Each CP reflects funding for an entire multi-school program. There are two CPs of \$97.86 million and \$10.0 million. This program has additional State, Federal and private funding sources which are not included in this column. Final estimates and actual spending are provided when available. Financial data is "DIIT", if data is not provided.</p>													

FOOTNOTES: PNS - Phase Not Started. Planned end dates are developed and entered when the phase starts. PNB - Project Not Budgeted. Budgets are developed during Scope and Design phases.

<b>Category Note:</b>												
<p>IEH (Industrial &amp; Environmental Hygiene) - These projects are environmental abatement projects performed on an as-needed basis. The work items are typically in response to requests by custodians. For IEH schedule data, the actual construction start date and completion dates are provided. Like Emergency projects, these projects are responses to identified environmental conditions and do not have formal scope and design phases. The only phase reported is Construction. For IEH financial data, CP and final estimate data are provided. Project budget data is "IEH" as these projects, like Emergency projects, are responses to environmental conditions and are funded as needed.</p>

<b>Category Note:</b>												
IEH (Industrial & Environmental Hygiene) - These projects are environmental abatement projects performed on an as-needed basis. The work items are typically in response to requests by custodians. For IEH schedule data, the actual construction start date and completion dates are provided. Like Emergency projects, these projects are responses to identified environmental conditions and do not have formal scope and design phases. The only phase reported is Construction. For IEH financial data, CP and final estimate data are provided. Project budget data is "IEH" as these projects, like Emergency projects, are responses to environmental conditions and are funded as needed.

Redesigning the network by engineers due to a discontinued key component of the school infrastructure resulted in additional construction time.						\$97,857,026						
<b>Category Note:</b>						DIIT (DOE Division of Instructional and Information Technology) - Project Connect involves purchase and installation of technology on projects such as infrastructure cabling, equipment and integration, wireless classroom integration/installation, retrofit and data and voice cabling, and internet video instruction servers (IVIS). Only the Purchase and Install phase appears in the Report since technology projects do not involve scope, design and construction. For schedule information, actual start and end dates are provided and planned completion dates are provided. For financial data, the funding is on a lump sum basis and the costs per school are dependent on survey results. Each CP reflects funding for an entire multi-school program. There are two CPs of \$97.86 million and \$10.0 million. This program has additional State, Federal and private funding sources which are not included in this column. Final estimates and actual spending are provided when available. Financial data is "DIIT", if data is not provided.

IEH (Industrial & Environmental Hygiene) - These projects are environmental abatement projects performed on an as-needed basis. The work items are typically in response to requests by custodians. For IEH schedule data, the actual construction start date and completion dates are provided. Like Emergency projects, these projects are responses to identified environmental conditions and do not have formal scope and design phases. The only phase reported is Construction. For IEH financial data, CP and final estimate data are provided. Project budget data is "IEH" as these projects, like Emergency projects, are responses to environmental conditions and are funded as needed.

<b>Category Note:</b> IEH (Industrial & Environmental Hygiene) - These projects are environmental abatement projects performed on an as-needed basis. The work items are typically in response to requests by custodians. For IEH schedule data, the actual construction start date and completion dates are provided. Like Emergency projects, these projects are responses to identified environmental conditions and do not have formal scope and design phases. The only phase reported is Construction. For IEH financial data, CP and final estimate data are provided. Project budget data is "IEH" as these projects, like Emergency projects, are responses to environmental conditions and are funded as needed.

Delay due to site survey.													
<b>Category Note:</b> DIIT (DOE Division of Instructional and Information Technology) - PBX (Private Branch Exchange) telephone systems facilitate the ability to support telephones in every classroom within a school building. Only the Purchase and Install phase appears in the report since technology projects do not involve scope, design and construction. For schedule information, actual start and end dates are provided and planned completion dates are provided if the project is in progress. For financial data, the funding is on a lump sum basis and the costs per school are dependent on survey results. The CP reflects funding for an entire multi-school program. The CP for these projects is \$31.1 million. This program has additional State, Federal and private funding sources which are not included in this column. Final estimates and actual spending are provided when available. Financial data is "DIIX", if data is not provided.

<b>Category Note:</b> IEH (Industrial & Environmental Hygiene) - These projects are environmental abatement projects performed on an as-needed basis. The work items are typically in response to requests by custodians. For IEH schedule data, the actual construction start date and completion dates are provided. Like Emergency projects, these projects are responses to identified environmental conditions and do not have formal scope and design phases. The only phase reported is Construction. For IEH financial data, CP and final estimate data are provided. Project budget data is "IEH" as these projects, like Emergency projects, are responses to environmental conditions and are funded as needed.												
X026	I.S. 390 - BRONX	DIIT - Project Connect	CLASSROOM CONNECTIVITY	Purch & Install	In-Progress	06/24/2013	12/31/2013	(1277)	DIIT	\$14,754	\$0

Redesigning the network by engineers due to a discontinued key component of the school infrastructure resulted in additional construction time.												
<b>Category Note:</b> DIIT (DOE Division of Instructional and Information Technology) - Project Connect involves purchase and installation of technology on projects such as infrastructure cabling, equipment and integration, wireless classroom integration/installation, retrofit and data and voice cabling, and internet video instruction servers (IVIS). Only the Purchase and Install phase appears in the Report since technology projects do not involve scope, design and construction. For schedule information, actual start and end dates are provided and planned completion dates are provided. For financial data, the funding is on a lump sum basis and the costs per school are dependent on survey results. Each CP reflects funding for an entire multi-school program. There are two CPs of \$97.86 million and \$10.0 million. This program has additional State, Federal and private funding sources which are not included in this column. Final estimates and actual spending are provided when available. Financial data is "DIIT", if data is not provided.

<b>Category Note:</b> IEH (Industrial & Environmental Hygiene) - These projects are environmental abatement projects performed on an as-needed basis. The work items are typically in response to requests by custodians. For IEH schedule data, the actual construction start date and completion dates are provided. Like Emergency projects, these projects are responses to identified environmental conditions and do not have formal scope and design phases. The only phase reported is Construction. For IEH financial data, CP and final estimate data are provided. Project budget data is "IEH" as these projects, like Emergency projects, are responses to environmental conditions and are funded as needed.

<b>Category Note:</b> Fast Track (Various Expedited Projects) - These projects are expedited when identified. In some cases there may not be a formal scope or design phase. Accordingly, the only phase reported is Construction. The actual construction start and end dates are provided. The planned construction completion date is "FTK" since these projects are expedited and do not have standard scheduled durations. Financial information includes the CP, final estimate, and actual spending. The final estimate does not include projections to complete the project. Project budget is "FTK" since the projects are expedited and are not budgeted.

<b>Category Note:</b> IEH (Industrial & Environmental Hygiene ) - These projects are environmental abatement projects performed on an as-needed basis. The work items are typically in response to requests by custodians. For IEH schedule data, the actual construction start date and completion dates are provided. Like Emergency projects, these projects are responses to identified environmental conditions and do not have formal scope and design phases. The only phase reported is Construction. For IEH financial data, CP and final estimate data are provided. Project budget data is "IEH" as these projects, like Emergency projects, are responses to environmental conditions and are funded as needed.												
X042	P.S. 42 - BRONX	DIIT - PBX Telephone System	NEW/RETROFIT TELEPHONE/INTERCOM SYS	Purch & Install	Complete	06/24/2013	12/31/2013	01/25/2017	(1121)	DIIX	\$177,511	\$177,511

Delay due to site survey.												
<b>Category Note:</b> DIIT (DOE Division of Instructional and Information Technology) - PBX (Private Branch Exchange) telephone systems facilitate the ability to support telephones in every classroom within a school building. Only the Purchase and Install phase appears in the report since technology projects do not involve scope, design and construction. For schedule information, actual start and end dates are provided and planned completion dates are provided if the project is in progress. For financial data, the funding is on a lump sum basis and the costs per school are dependent on survey results. The CP reflects funding for an entire multi-school program. The CP for these projects is \$31.1 million. This program has additional State, Federal and private funding sources which are not included in this column. Final estimates and actual spending are provided when available. Financial data is "DIIX", if data is not provided.

Redesigning the network by engineers due to a discontinued key component of the school infrastructure resulted in additional construction time.												
<b>Category Note:</b> DIIT (DOE Division of Instructional and Information Technology) - Project Connect involves purchase and installation of technology on projects such as infrastructure cabling, equipment and integration, wireless classroom integration/installation, retrofit and data and voice cabling, and internet video instruction servers (IVIS). Only the Purchase and Install phase appears in the Report since technology projects do not involve scope, design and construction. For schedule information, actual start and end dates are provided and planned completion dates are provided. For financial data, the funding is on a lump sum basis and the costs per school are dependent on survey results. Each CP reflects funding for an entire multi-school program. There are two CPs of \$97.86 million and \$10.0 million. This program has additional State, Federal and private funding sources which are not included in this column. Final estimates and actual spending are provided when available. Financial data is "DIIT", if data is not provided.												

FOOTNOTES: PNS - Phase Not Started. Planned end dates are developed and entered when the phase starts. PNB - Project Not Budgeted. Budgets are developed during Scope and Design phases.

Redesigning the network by engineers due to a discontinued key component of the school infrastructure resulted in additional construction time.												
<b>Category Note:</b> DIIT (DOE Division of Instructional and Information Technology) - Project Connect involves purchase and installation of technology on projects such as infrastructure cabling, equipment and integration, wireless classroom integration/installation, retrofit and data and voice cabling, and internet video instruction servers (IVIS). Only the Purchase and Install phase appears in the Report since technology projects do not involve scope, design and construction. For schedule information, actual start and end dates are provided and planned completion dates are provided. For financial data, the funding is on a lump sum basis and the costs per school are dependent on survey results. Each CP reflects funding for an entire multi-school program. There are two CPs of \$97.86 million and \$10.0 million. This program has additional State, Federal and private funding sources which are not included in this column. Final estimates and actual spending are provided when available. Financial data is "DIIT", if data is not provided.

Redesigning the network by engineers due to a discontinued key component of the school infrastructure resulted in additional construction time.												
<b>Category Note:</b> DIIT (DOE Division of Instructional and Information Technology) - Project Connect involves purchase and installation of technology on projects such as infrastructure cabling, equipment and integration, wireless classroom integration/installation, retrofit and data and voice cabling, and internet video instruction servers (IVIS). Only the Purchase and Install phase appears in the Report since technology projects do not involve scope, design and construction. For schedule information, actual start and end dates are provided and planned completion dates are provided. For financial data, the funding is on a lump sum basis and the costs per school are dependent on survey results. Each CP reflects funding for an entire multi-school program. There are two CPs of \$97.86 million and \$10.0 million. This program has additional State, Federal and private funding sources which are not included in this column. Final estimates and actual spending are provided when available. Financial data is "DIIT", if data is not provided.

Redesigning the network by engineers due to a discontinued key component of the school infrastructure resulted in additional construction time.												
<b>Category Note:</b>						DIIT (DOE Division of Instructional and Information Technology) - Project Connect involves purchase and installation of technology on projects such as infrastructure cabling, equipment and integration, wireless classroom integration/installation, retrofit and data and voice cabling, and internet video instruction servers (IVIS). Only the Purchase and Install phase appears in the Report since technology projects do not involve scope, design and construction. For schedule information, actual start and end dates are provided and planned completion dates are provided. For financial data, the funding is on a lump sum basis and the costs per school are dependent on survey results. Each CP reflects funding for an entire multi-school program. There are two CPs of \$97.86 million and \$10.0 million. This program has additional State, Federal and private funding sources which are not included in this column. Final estimates and actual spending are provided when available. Financial data is "DIIT", if data is not provided.

IEH (Industrial & Environmental Hygiene) - These projects are environmental abatement projects performed on an as-needed basis. The work items are typically in response to requests by custodians. For IEH schedule data, the actual construction start date and completion dates are provided. Like Emergency projects, these projects are responses to identified environmental conditions and do not have formal scope and design phases. The only phase reported is Construction. For IEH financial data, CP and final estimate data are provided. Project budget data is "IEH" as these projects, like Emergency projects, are responses to environmental conditions and are funded as needed.

Redesigning the network by engineers due to a discontinued key component of the school infrastructure resulted in additional construction time.						\$97,857,026		DIIT		DIIT		
<b>Category Note:</b>						DIIT (DOE Division of Instructional and Information Technology) - Project Connect involves purchase and installation of technology on projects such as infrastructure cabling, equipment and integration, wireless classroom integration/installation, retrofit and data and voice cabling, and internet video instruction servers (IVIS). Only the Purchase and Install phase appears in the Report since technology projects do not involve scope, design and construction. For schedule information, actual start and end dates are provided and planned completion dates are provided. For financial data, the funding is on a lump sum basis and the costs per school are dependent on survey results. Each CP reflects funding for an entire multi-school program. There are two CPs of \$97.86 million and \$10.0 million. This program has additional State, Federal and private funding sources which are not included in this column. Final estimates and actual spending are provided when available. Financial data is "DIIT", if data is not provided.

Redesigning the network by engineers due to a discontinued key component of the school infrastructure resulted in additional construction time.						\$97,857,026		DIIT		DIIT		
<b>Category Note:</b>						DIIT (DOE Division of Instructional and Information Technology) - Project Connect involves purchase and installation of technology on projects such as infrastructure cabling, equipment and integration, wireless classroom integration/installation, retrofit and data and voice cabling, and internet video instruction servers (IVIS). Only the Purchase and Install phase appears in the Report since technology projects do not involve scope, design and construction. For schedule information, actual start and end dates are provided and planned completion dates are provided. For financial data, the funding is on a lump sum basis and the costs per school are dependent on survey results. Each CP reflects funding for an entire multi-school program. There are two CPs of \$97.86 million and \$10.0 million. This program has additional State, Federal and private funding sources which are not included in this column. Final estimates and actual spending are provided when available. Financial data is "DIIT", if data is not provided.

<b>Category Note:</b> Fast Track (Various Expedited Projects) - These projects are expedited when identified. In some cases there may not be a formal scope or design phase. Accordingly, the only phase reported is Construction. The actual construction start and end dates are provided. The planned construction completion date is "FTK" since these projects are expedited and do not have standard scheduled durations. Financial information includes the CP, final estimate, and actual spending. The final estimate does not include projections to complete the project. Project budget is "FTK" since the projects are expedited and are not budgeted.
