Delay due to site survey.													
<b>Category Note:</b>													
DIIT (DOE Division of Instructional and Information Technology) - PBX (Private Branch Exchange) telephone systems facilitate the ability to support telephones in every classroom within a school building. Only the Purchase and Install phase appears in the report since technology projects do not involve scope, design and construction. For schedule information, actual start and end dates are provided and planned completion dates are provided if the project is in progress. For financial data, the funding is on a lump sum basis and the costs per school are dependent on survey results. The CP reflects funding for an entire multi-school program. The CP for these projects is \$31.1 million. This program has additional State, Federal and private funding sources which are not included in this column. Final estimates and actual spending are provided when available. Financial data is "DIIX", if data is not provided.

<b>Category Note:</b>													
<p>IEH (Industrial &amp; Environmental Hygiene) - These projects are environmental abatement projects performed on an as-needed basis. The work items are typically in response to requests by custodians. For IEH schedule data, the actual construction start date and completion dates are provided. Like Emergency projects, these projects are responses to identified environmental conditions and do not have formal scope and design phases. The only phase reported is Construction. For IEH financial data, CP and final estimate data are provided. Project budget data is "IEH" as these projects, like Emergency projects, are responses to environmental conditions and are funded as needed.</p>

<b>Category Note:</b>													
EMER (Emergency Response) - These projects are performed as emergencies are identified. Generally the emergency must be remediated immediately and there is no formal scope or design phase. Accordingly, the only phase reported is Construction. The actual construction start and end dates are provided. The planned construction completion date is "EMER" since these projects are emergencies and do not have standard scheduled durations. Emergency Response financial information includes the CP, final estimate, and actual spending. The final estimate is "EMER" until an initial estimate is obtained. The final estimate does not include projections to complete the project. Project budget is "EMER" since the projects are emergencies and are not budgeted.													

FOOTNOTES: PNS - Phase Not Started. Planned end dates are developed and entered when the phase starts. PNB - Project Not Budgeted. Budgets are developed during Scope and Design phases.

Redesigning the network by engineers due to a discontinued key component of the school infrastructure resulted in additional construction time.												
<b>Category Note:</b> DIIT (DOE Division of Instructional and Information Technology) - Project Connect involves purchase and installation of technology on projects such as infrastructure cabling, equipment and integration, wireless classroom integration/installation, retrofit and data and voice cabling, and internet video instruction servers (IVIS). Only the Purchase and Install phase appears in the Report since technology projects do not involve scope, design and construction. For schedule information, actual start and end dates are provided and planned completion dates are provided. For financial data, the funding is on a lump sum basis and the costs per school are dependent on survey results. Each CP reflects funding for an entire multi-school program. There are two CPs of \$97.86 million and \$10.0 million. This program has additional State, Federal and private funding sources which are not included in this column. Final estimates and actual spending are provided when available. Financial data is "DIIT", if data is not provided.

Redesigning the network by engineers due to a discontinued key component of the school infrastructure resulted in additional construction time.												
<b>Category Note:</b> DIIT (DOE Division of Instructional and Information Technology) - Project Connect involves purchase and installation of technology on projects such as infrastructure cabling, equipment and integration, wireless classroom integration/installation, retrofit and data and voice cabling, and internet video instruction servers (IVIS). Only the Purchase and Install phase appears in the Report since technology projects do not involve scope, design and construction. For schedule information, actual start and end dates are provided and planned completion dates are provided. For financial data, the funding is on a lump sum basis and the costs per school are dependent on survey results. Each CP reflects funding for an entire multi-school program. There are two CPs of \$97.86 million and \$10.0 million. This program has additional State, Federal and private funding sources which are not included in this column. Final estimates and actual spending are provided when available. Financial data is "DIIT", if data is not provided.

IEH (Industrial & Environmental Hygiene) - These projects are environmental abatement projects performed on an as-needed basis. The work items are typically in response to requests by custodians. For IEH schedule data, the actual construction start date and completion dates are provided. Like Emergency projects, these projects are responses to identified environmental conditions and do not have formal scope and design phases. The only phase reported is Construction. For IEH financial data, CP and final estimate data are provided. Project budget data is "IEH" as these projects, like Emergency projects, are responses to environmental conditions and are funded as needed.

<b>Category Note:</b>												
IEH (Industrial & Environmental Hygiene) - These projects are environmental abatement projects performed on an as-needed basis. The work items are typically in response to requests by custodians. For IEH schedule data, the actual construction start date and completion dates are provided. Like Emergency projects, these projects are responses to identified environmental conditions and do not have formal scope and design phases. The only phase reported is Construction. For IEH financial data, CP and final estimate data are provided. Project budget data is "IEH" as these projects, like Emergency projects, are responses to environmental conditions and are funded as needed.

Redesigning the network by engineers due to a discontinued key component of the school infrastructure resulted in additional construction time.												
<b>Category Note:</b>						DIIT (DOE Division of Instructional and Information Technology) - Project Connect involves purchase and installation of technology on projects such as infrastructure cabling, equipment and integration, wireless classroom integration/installation, retrofit and data and voice cabling, and internet video instruction servers (IVIS). Only the Purchase and Install phase appears in the Report since technology projects do not involve scope, design and construction. For schedule information, actual start and end dates are provided and planned completion dates are provided. For financial data, the funding is on a lump sum basis and the costs per school are dependent on survey results. Each CP reflects funding for an entire multi-school program. There are two CPs of \$97.86 million and \$10.0 million. This program has additional State, Federal and private funding sources which are not included in this column. Final estimates and actual spending are provided when available. Financial data is "DIIT", if data is not provided.

<p>IEH (Industrial &amp; Environmental Hygiene) - These projects are environmental abatement projects performed on an as-needed basis. The work items are typically in response to requests by custodians. For IEH schedule data, the actual construction start date and completion dates are provided. Like Emergency projects, these projects are responses to identified environmental conditions and do not have formal scope and design phases. The only phase reported is Construction. For IEH financial data, CP and final estimate data are provided. Project budget data is "IEH" as these projects, like Emergency projects, are responses to environmental conditions and are funded as needed.</p>

Redesigning the network by engineers due to a discontinued key component of the school infrastructure resulted in additional construction time.												
<b>Category Note:</b>												
DIIT (DOE Division of Instructional and Information Technology) - Project Connect involves purchase and installation of technology on projects such as infrastructure cabling, equipment and integration, wireless classroom integration/installation, retrofit and data and voice cabling, and internet video instruction servers (IVIS). Only the Purchase and Install phase appears in the Report since technology projects do not involve scope, design and construction. For schedule information, actual start and end dates are provided and planned completion dates are provided. For financial data, the funding is on a lump sum basis and the costs per school are dependent on survey results. Each CP reflects funding for an entire multi-school program. There are two CPs of \$97.86 million and \$10.0 million. This program has additional State, Federal and private funding sources which are not included in this column. Final estimates and actual spending are provided when available. Financial data is "DIIT", if data is not provided.

Redesigning the network by engineers due to a discontinued key component of the school infrastructure resulted in additional construction time.						\$97,857,026						
<b>Category Note:</b>						DIIT (DOE Division of Instructional and Information Technology) - Project Connect involves purchase and installation of technology on projects such as infrastructure cabling, equipment and integration, wireless classroom integration/installation, retrofit and data and voice cabling, and internet video instruction servers (IVIS). Only the Purchase and Install phase appears in the Report since technology projects do not involve scope, design and construction. For schedule information, actual start and end dates are provided and planned completion dates are provided. For financial data, the funding is on a lump sum basis and the costs per school are dependent on survey results. Each CP reflects funding for an entire multi-school program. There are two CPs of \$97.86 million and \$10.0 million. This program has additional State, Federal and private funding sources which are not included in this column. Final estimates and actual spending are provided when available. Financial data is "DIIT", if data is not provided.

Redesigning the network by engineers due to a discontinued key component of the school infrastructure resulted in additional construction time.											
<b>Category Note:</b> DIIT (DOE Division of Instructional and Information Technology) - Project Connect involves purchase and installation of technology on projects such as infrastructure cabling, equipment and integration, wireless classroom integration/installation, retrofit and data and voice cabling, and internet video instruction servers (IVIS). Only the Purchase and Install phase appears in the Report since technology projects do not involve scope, design and construction. For schedule information, actual start and end dates are provided and planned completion dates are provided. For financial data, the funding is on a lump sum basis and the costs per school are dependent on survey results. Each CP reflects funding for an entire multi-school program. There are two CPs of \$97.86 million and \$10.0 million. This program has additional State, Federal and private funding sources which are not included in this column. Final estimates and actual spending are provided when available. Financial data is "DIIT", if data is not provided.

Q198	P.S. 333 - QUEENS	Fast Track Projects	EMERGENCY PROTECTIVE MEASURES - HURRICANE SANDY	Construction	In-Progress	10/31/2012	FTK		FTK	FTK	\$3,341,852	\$3,126,309
DSF: 0000023483												
<b>Total</b>										FTK	<b>\$3,341,852</b>	<b>\$3,126,309</b>
<b>Explanations:</b>						<b>OMB CP Authorized Amount</b>	<b>\$3,341,852</b>	<b>\$ Variance, Project Budget to Final Estimate</b>		<b>FTK</b>	<b>% Final Estimate Amount to Project Budget Under/( Over)</b>	<b>FTK</b>
<b>Category Note:</b> Fast Track (Various Expedited Projects) - These projects are expedited when identified. In some cases there may not be a formal scope or design phase. Accordingly, the only phase reported is Construction. The actual construction start and end dates are provided. The planned construction completion date is "FTK" since these projects are expedited and do not have standard scheduled durations. Financial information includes the CP, final estimate, and actual spending. The final estimate does not include projections to complete the project. Project budget is "FTK" since the projects are expedited and are not budgeted.

<b>Category Note:</b> IEH (Industrial & Environmental Hygiene ) - These projects are environmental abatement projects performed on an as-needed basis. The work items are typically in response to requests by custodians. For IEH schedule data, the actual construction start date and completion dates are provided. Like Emergency projects, these projects are responses to identified environmental conditions and do not have formal scope and design phases. The only phase reported is Construction. For IEH financial data, CP and final estimate data are provided. Project budget data is "IEH" as these projects, like Emergency projects, are responses to environmental conditions and are funded as needed.

Q207	P.S. 207 - QUEENS	Fast Track Projects	EMERGENCY PROTECTIVE MEASURES - HURRICANE SANDY	Construction	Complete	10/31/2012	FTK	02/05/2016	FTK	FTK	\$4,455,027	\$4,371,787	
DSF: 0000023473						<b>Total</b>					FTK	\$4,455,027	\$4,371,787
<b>Explanations:</b>						<b>OMB CP Authorized Amount</b>	\$4,455,027	<b>\$ Variance, Project Budget to Final Estimate</b>		FTK	<b>% Final Estimate Amount to Project Budget Under/( Over)</b>		FTK
<b>Category Note:</b> Fast Track (Various Expedited Projects) - These projects are expedited when identified. In some cases there may not be a formal scope or design phase. Accordingly, the only phase reported is Construction. The actual construction start and end dates are provided. The planned construction completion date is "FTK" since these projects are expedited and do not have standard scheduled durations. Financial information includes the CP, final estimate, and actual spending. The final estimate does not include projections to complete the project. Project budget is "FTK" since the projects are expedited and are not budgeted.													
Q207	P.S. 207 ROCKWOOD PARK	DIIT - RESOA	FY17 RESO A TECHNOLOGY	Purch & Install	Complete	02/07/2017	04/27/2017	04/27/2017	0	\$100,000	\$99,238	\$99,238

<b>Category Note:</b>													
Fast Track (Various Expedited Projects) - These projects are expedited when identified. In some cases there may not be a formal scope or design phase. Accordingly, the only phase reported is Construction. The actual construction start and end dates are provided. The planned construction completion date is "FTK" since these projects are expedited and do not have standard scheduled durations. Financial information includes the CP, final estimate, and actual spending. The final estimate does not include projections to complete the project. Project budget is "FTK" since the projects are expedited and are not budgeted.

Redesigning the network by engineers due to a discontinued key component of the school infrastructure resulted in additional construction time.												
<b>Category Note:</b> DIIT (DOE Division of Instructional and Information Technology) - Project Connect involves purchase and installation of technology on projects such as infrastructure cabling, equipment and integration, wireless classroom integration/installation, retrofit and data and voice cabling, and internet video instruction servers (IVIS). Only the Purchase and Install phase appears in the Report since technology projects do not involve scope, design and construction. For schedule information, actual start and end dates are provided and planned completion dates are provided. For financial data, the funding is on a lump sum basis and the costs per school are dependent on survey results. Each CP reflects funding for an entire multi-school program. There are two CPs of \$97.86 million and \$10.0 million. This program has additional State, Federal and private funding sources which are not included in this column. Final estimates and actual spending are provided when available. Financial data is "DIIT", if data is not provided.

<b>Category Note:</b> IEH (Industrial & Environmental Hygiene) - These projects are environmental abatement projects performed on an as-needed basis. The work items are typically in response to requests by custodians. For IEH schedule data, the actual construction start date and completion dates are provided. Like Emergency projects, these projects are responses to identified environmental conditions and do not have formal scope and design phases. The only phase reported is Construction. For IEH financial data, CP and final estimate data are provided. Project budget data is "IEH" as these projects, like Emergency projects, are responses to environmental conditions and are funded as needed.

Redesigning the network by engineers due to a discontinued key component of the school infrastructure resulted in additional construction time.												
<b>Category Note:</b>						DIIT (DOE Division of Instructional and Information Technology) - Project Connect involves purchase and installation of technology on projects such as infrastructure cabling, equipment and integration, wireless classroom integration/installation, retrofit and data and voice cabling, and internet video instruction servers (IVIS). Only the Purchase and Install phase appears in the Report since technology projects do not involve scope, design and construction. For schedule information, actual start and end dates are provided and planned completion dates are provided. For financial data, the funding is on a lump sum basis and the costs per school are dependent on survey results. Each CP reflects funding for an entire multi-school program. There are two CPs of \$97.86 million and \$10.0 million. This program has additional State, Federal and private funding sources which are not included in this column. Final estimates and actual spending are provided when available. Financial data is "DIIT", if data is not provided.

IEH (Industrial & Environmental Hygiene) - These projects are environmental abatement projects performed on an as-needed basis. The work items are typically in response to requests by custodians. For IEH schedule data, the actual construction start date and completion dates are provided. Like Emergency projects, these projects are responses to identified environmental conditions and do not have formal scope and design phases. The only phase reported is Construction. For IEH financial data, CP and final estimate data are provided. Project budget data is "IEH" as these projects, like Emergency projects, are responses to environmental conditions and are funded as needed.

<b>Category Note:</b>													
EMER (Emergency Response) - These projects are performed as emergencies are identified. Generally the emergency must be remediated immediately and there is no formal scope or design phase. Accordingly, the only phase reported is Construction. The actual construction start and end dates are provided. The planned construction completion date is "EMER" since these projects are emergencies and do not have standard scheduled durations. Emergency Response financial information includes the CP, final estimate, and actual spending. The final estimate is "EMER" until an initial estimate is obtained. The final estimate does not include projections to complete the project. Project budget is "EMER" since the projects are emergencies and are not budgeted.

Redesigning the network by engineers due to a discontinued key component of the school infrastructure resulted in additional construction time.													
<b>Category Note:</b> DIIT (DOE Division of Instructional and Information Technology) - Project Connect involves purchase and installation of technology on projects such as infrastructure cabling, equipment and integration, wireless classroom integration/installation, retrofit and data and voice cabling, and internet video instruction servers (IVIS). Only the Purchase and Install phase appears in the Report since technology projects do not involve scope, design and construction. For schedule information, actual start and end dates are provided and planned completion dates are provided. For financial data, the funding is on a lump sum basis and the costs per school are dependent on survey results. Each CP reflects funding for an entire multi-school program. There are two CPs of \$97.86 million and \$10.0 million. This program has additional State, Federal and private funding sources which are not included in this column. Final estimates and actual spending are provided when available. Financial data is "DIIT", if data is not provided.

Redesigning the network by engineers due to a discontinued key component of the school infrastructure resulted in additional construction time.												
<b>Category Note:</b> DIIT (DOE Division of Instructional and Information Technology) - Project Connect involves purchase and installation of technology on projects such as infrastructure cabling, equipment and integration, wireless classroom integration/installation, retrofit and data and voice cabling, and internet video instruction servers (IVIS). Only the Purchase and Install phase appears in the Report since technology projects do not involve scope, design and construction. For schedule information, actual start and end dates are provided and planned completion dates are provided. For financial data, the funding is on a lump sum basis and the costs per school are dependent on survey results. Each CP reflects funding for an entire multi-school program. There are two CPs of \$97.86 million and \$10.0 million. This program has additional State, Federal and private funding sources which are not included in this column. Final estimates and actual spending are provided when available. Financial data is "DIIT", if data is not provided.

Redesigning the network by engineers due to a discontinued key component of the school infrastructure resulted in additional construction time.												
<b>Category Note:</b>												
DIIT (DOE Division of Instructional and Information Technology) - Project Connect involves purchase and installation of technology on projects such as infrastructure cabling, equipment and integration, wireless classroom integration/installation, retrofit and data and voice cabling, and internet video instruction servers (IVIS). Only the Purchase and Install phase appears in the Report since technology projects do not involve scope, design and construction. For schedule information, actual start and end dates are provided and planned completion dates are provided. For financial data, the funding is on a lump sum basis and the costs per school are dependent on survey results. Each CP reflects funding for an entire multi-school program. There are two CPs of \$97.86 million and \$10.0 million. This program has additional State, Federal and private funding sources which are not included in this column. Final estimates and actual spending are provided when available. Financial data is "DIIT", if data is not provided.

Redesigning the network by engineers due to a discontinued key component of the school infrastructure resulted in additional construction time.												
<b>Category Note:</b> DIIT (DOE Division of Instructional and Information Technology) - Project Connect involves purchase and installation of technology on projects such as infrastructure cabling, equipment and integration, wireless classroom integration/installation, retrofit and data and voice cabling, and internet video instruction servers (IVIS). Only the Purchase and Install phase appears in the Report since technology projects do not involve scope, design and construction. For schedule information, actual start and end dates are provided and planned completion dates are provided. For financial data, the funding is on a lump sum basis and the costs per school are dependent on survey results. Each CP reflects funding for an entire multi-school program. There are two CPs of \$97.86 million and \$10.0 million. This program has additional State, Federal and private funding sources which are not included in this column. Final estimates and actual spending are provided when available. Financial data is "DIIT", if data is not provided.

<b>Category Note:</b> EMER (Emergency Response) - These projects are performed as emergencies are identified. Generally the emergency must be remediated immediately and there is no formal scope or design phase. Accordingly, the only phase reported is Construction. The actual construction start and end dates are provided. The planned construction completion date is "EMER" since these projects are emergencies and do not have standard scheduled durations. Emergency Response financial information includes the CP, final estimate, and actual spending. The final estimate is "EMER" until an initial estimate is obtained. The final estimate does not include projections to complete the project. Project budget is "EMER" since the projects are emergencies and are not budgeted.

The work items are typically in response to requests by custodians. For IEH schedule data, the actual construction start date and completion dates are provided. Like Emergency projects, these projects are responses to identified environmental conditions and do not have formal scope and design phases. The only phase reported is Construction. For IEH financial data, CP and final estimate data are provided. Project budget data is "IEH" as these projects, like Emergency projects, are responses to environmental conditions and are funded as needed.

Redesigning the network by engineers due to a discontinued key component of the school infrastructure resulted in additional construction time.												
<b>Category Note:</b> DIIT (DOE Division of Instructional and Information Technology) - Project Connect involves purchase and installation of technology on projects such as infrastructure cabling, equipment and integration, wireless classroom integration/installation, retrofit and data and voice cabling, and internet video instruction servers (IVIS). Only the Purchase and Install phase appears in the Report since technology projects do not involve scope, design and construction. For schedule information, actual start and end dates are provided and planned completion dates are provided. For financial data, the funding is on a lump sum basis and the costs per school are dependent on survey results. Each CP reflects funding for an entire multi-school program. There are two CPs of \$97.86 million and \$10.0 million. This program has additional State, Federal and private funding sources which are not included in this column. Final estimates and actual spending are provided when available. Financial data is "DIIT", if data is not provided.

Delay due to site survey.												
<b>Category Note:</b> DIIT (DOE Division of Instructional and Information Technology) - PBX (Private Branch Exchange) telephone systems facilitate the ability to support telephones in every classroom within a school building. Only the Purchase and Install phase appears in the report since technology projects do not involve scope, design and construction. For schedule information, actual start and end dates are provided and planned completion dates are provided if the project is in progress. For financial data, the funding is on a lump sum basis and the costs per school are dependent on survey results. The CP reflects funding for an entire multi-school program. The CP for these projects is \$31.1 million. This program has additional State, Federal and private funding sources which are not included in this column. Final estimates and actual spending are provided when available. Financial data is "DIIX", if data is not provided.

<b>Category Note:</b> DIIT (DOE Division of Instructional and Information Technology) - Project Connect involves purchase and installation of technology on projects such as infrastructure cabling, equipment and integration, wireless classroom integration/installation, retrofit and data and voice cabling, and internet video instruction servers (IVIS). Only the Purchase and Install phase appears in the Report since technology projects do not involve scope, design and construction. For schedule information, actual start and end dates are provided and planned completion dates are provided. For financial data, the funding is on a lump sum basis and the costs per school are dependent on survey results. Each CP reflects funding for an entire multi-school program. There are two CPs of \$97.86 million and \$10.0 million. This program has additional State, Federal and private funding sources which are not included in this column. Final estimates and actual spending are provided when available. Financial data is "DIIT", if data is not provided.

<b>Explanations:</b> Redesigning the network by engineers due to a discontinued key component of the school infrastructure resulted in additional construction time.						<b>OMB CP Authorized Amount</b>	\$97,857,026	<b>\$ Variance, Project Budget to Final Estimate</b>		DIIT	<b>% Final Estimate Amount to Project Budget Under/( Over)</b>	DIIT			
<b>Category Note:</b> DIIT (DOE Division of Instructional and Information Technology) - Project Connect involves purchase and installation of technology on projects such as infrastructure cabling, equipment and integration, wireless classroom integration/installation, retrofit and data and voice cabling, and internet video instruction servers (IVIS). Only the Purchase and Install phase appears in the Report since technology projects do not involve scope, design and construction. For schedule information, actual start and end dates are provided and planned completion dates are provided. For financial data, the funding is on a lump sum basis and the costs per school are dependent on survey results. Each CP reflects funding for an entire multi-school program. There are two CPs of \$97.86 million and \$10.0 million. This program has additional State, Federal and private funding sources which are not included in this column. Final estimates and actual spending are provided when available. Financial data is "DIIT", if data is not provided.

<b>Category Note:</b> Fast Track (Various Expedited Projects) - These projects are expedited when identified. In some cases there may not be a formal scope or design phase. Accordingly, the only phase reported is Construction. The actual construction start and end dates are provided. The planned construction completion date is "FTK" since these projects are expedited and do not have standard scheduled durations. Financial information includes the CP, final estimate, and actual spending. The final estimate does not include projections to complete the project. Project budget is "FTK" since the projects are expedited and are not budgeted.													

FOOTNOTES: PNS - Phase Not Started. Planned end dates are developed and entered when the phase starts. PNB - Project Not Budgeted. Budgets are developed during Scope and Design phases.

Redesigning the network by engineers due to a discontinued key component of the school infrastructure resulted in additional construction time.												
<b>Category Note:</b> DIIT (DOE Division of Instructional and Information Technology) - Project Connect involves purchase and installation of technology on projects such as infrastructure cabling, equipment and integration, wireless classroom integration/installation, retrofit and data and voice cabling, and internet video instruction servers (IVIS). Only the Purchase and Install phase appears in the Report since technology projects do not involve scope, design and construction. For schedule information, actual start and end dates are provided and planned completion dates are provided. For financial data, the funding is on a lump sum basis and the costs per school are dependent on survey results. Each CP reflects funding for an entire multi-school program. There are two CPs of \$97.86 million and \$10.0 million. This program has additional State, Federal and private funding sources which are not included in this column. Final estimates and actual spending are provided when available. Financial data is "DIIT", if data is not provided.

Redesigning the network by engineers due to a discontinued key component of the school infrastructure resulted in additional construction time.							\$97,857,026		DIIT		DIIT		
<b>Category Note:</b>							DIIT (DOE Division of Instructional and Information Technology) - Project Connect involves purchase and installation of technology on projects such as infrastructure cabling, equipment and integration, wireless classroom integration/installation, retrofit and data and voice cabling, and internet video instruction servers (IVIS). Only the Purchase and Install phase appears in the Report since technology projects do not involve scope, design and construction. For schedule information, actual start and end dates are provided and planned completion dates are provided. For financial data, the funding is on a lump sum basis and the costs per school are dependent on survey results. Each CP reflects funding for an entire multi-school program. There are two CPs of \$97.86 million and \$10.0 million. This program has additional State, Federal and private funding sources which are not included in this column. Final estimates and actual spending are provided when available. Financial data is "DIIT", if data is not provided.

<b>Category Note:</b> IEH (Industrial & Environmental Hygiene ) - These projects are environmental abatement projects performed on an as-needed basis. The work items are typically in response to requests by custodians. For IEH schedule data, the actual construction start date and completion dates are provided. Like Emergency projects, these projects are responses to identified environmental conditions and do not have formal scope and design phases. The only phase reported is Construction. For IEH financial data, CP and final estimate data are provided. Project budget data is "IEH" as these projects, like Emergency projects, are responses to environmental conditions and are funded as needed.

Redesigning the network by engineers due to a discontinued key component of the school infrastructure resulted in additional construction time.												
<b>Category Note:</b> DIIT (DOE Division of Instructional and Information Technology) - Project Connect involves purchase and installation of technology on projects such as infrastructure cabling, equipment and integration, wireless classroom integration/installation, retrofit and data and voice cabling, and internet video instruction servers (IVIS). Only the Purchase and Install phase appears in the Report since technology projects do not involve scope, design and construction. For schedule information, actual start and end dates are provided and planned completion dates are provided. For financial data, the funding is on a lump sum basis and the costs per school are dependent on survey results. Each CP reflects funding for an entire multi-school program. There are two CPs of \$97.86 million and \$10.0 million. This program has additional State, Federal and private funding sources which are not included in this column. Final estimates and actual spending are provided when available. Financial data is "DIIT", if data is not provided.

Redesigning the network by engineers due to a discontinued key component of the school infrastructure resulted in additional construction time.												
<b>Category Note:</b> DIIT (DOE Division of Instructional and Information Technology) - Project Connect involves purchase and installation of technology on projects such as infrastructure cabling, equipment and integration, wireless classroom integration/installation, retrofit and data and voice cabling, and internet video instruction servers (IVIS). Only the Purchase and Install phase appears in the Report since technology projects do not involve scope, design and construction. For schedule information, actual start and end dates are provided and planned completion dates are provided. For financial data, the funding is on a lump sum basis and the costs per school are dependent on survey results. Each CP reflects funding for an entire multi-school program. There are two CPs of \$97.86 million and \$10.0 million. This program has additional State, Federal and private funding sources which are not included in this column. Final estimates and actual spending are provided when available. Financial data is "DIIT", if data is not provided.

Redesigning the network by engineers due to a discontinued key component of the school infrastructure resulted in additional construction time.							\$97,857,026						DIIT
<b>Category Note:</b>													
DIIT (DOE Division of Instructional and Information Technology) - Project Connect involves purchase and installation of technology on projects such as infrastructure cabling, equipment and integration, wireless classroom integration/installation, retrofit and data and voice cabling, and internet video instruction servers (IVIS). Only the Purchase and Install phase appears in the Report since technology projects do not involve scope, design and construction. For schedule information, actual start and end dates are provided and planned completion dates are provided. For financial data, the funding is on a lump sum basis and the costs per school are dependent on survey results. Each CP reflects funding for an entire multi-school program. There are two CPs of \$97.86 million and \$10.0 million. This program has additional State, Federal and private funding sources which are not included in this column. Final estimates and actual spending are provided when available. Financial data is "DIIT", if data is not provided.

<b>Explanations:</b>						<b>OMB CP Authorized Amount</b>	\$49	<b>\$ Variance, Project Budget to Final Estimate</b>		<b>% Final Estimate Amount to Project Budget Under/( Over)</b>		
<b>Category Note:</b> IEH (Industrial & Environmental Hygiene ) - These projects are environmental abatement projects performed on an as-needed basis. The work items are typically in response to requests by custodians. For IEH schedule data, the actual construction start date and completion dates are provided. Like Emergency projects, these projects are responses to identified environmental conditions and do not have formal scope and design phases. The only phase reported is Construction. For IEH financial data, CP and final estimate data are provided. Project budget data is "IEH" as these projects, like Emergency projects, are responses to environmental conditions and are funded as needed.									IEH		IEH

Redesigning the network by engineers due to a discontinued key component of the school infrastructure resulted in additional construction time.												
<b>Category Note:</b>												
DIIT (DOE Division of Instructional and Information Technology) - Project Connect involves purchase and installation of technology on projects such as infrastructure cabling, equipment and integration, wireless classroom integration/installation, retrofit and data and voice cabling, and internet video instruction servers (IVIS). Only the Purchase and Install phase appears in the Report since technology projects do not involve scope, design and construction. For schedule information, actual start and end dates are provided and planned completion dates are provided. For financial data, the funding is on a lump sum basis and the costs per school are dependent on survey results. Each CP reflects funding for an entire multi-school program. There are two CPs of \$97.86 million and \$10.0 million. This program has additional State, Federal and private funding sources which are not included in this column. Final estimates and actual spending are provided when available. Financial data is "DIIT", if data is not provided.

<b>Category Note:</b> EMER (Emergency Response) - These projects are performed as emergencies are identified. Generally the emergency must be remediated immediately and there is no formal scope or design phase. Accordingly, the only phase reported is Construction. The actual construction start and end dates are provided. The planned construction completion date is "EMER" since these projects are emergencies and do not have standard scheduled durations. Emergency Response financial information includes the CP, final estimate, and actual spending. The final estimate is "EMER" until an initial estimate is obtained. The final estimate does not include projections to complete the project. Project budget is "EMER" since the projects are emergencies and are not budgeted.

Redesigning the network by engineers due to a discontinued key component of the school infrastructure resulted in additional construction time.												
<b>Category Note:</b> DIIT (DOE Division of Instructional and Information Technology) - Project Connect involves purchase and installation of technology on projects such as infrastructure cabling, equipment and integration, wireless classroom integration/installation, retrofit and data and voice cabling, and internet video instruction servers (IVIS). Only the Purchase and Install phase appears in the Report since technology projects do not involve scope, design and construction. For schedule information, actual start and end dates are provided and planned completion dates are provided. For financial data, the funding is on a lump sum basis and the costs per school are dependent on survey results. Each CP reflects funding for an entire multi-school program. There are two CPs of \$97.86 million and \$10.0 million. This program has additional State, Federal and private funding sources which are not included in this column. Final estimates and actual spending are provided when available. Financial data is "DIIT", if data is not provided.

Redesigning the network by engineers due to a discontinued key component of the school infrastructure resulted in additional construction time.													
<b>Category Note:</b>													
DIIT (DOE Division of Instructional and Information Technology) - Project Connect involves purchase and installation of technology on projects such as infrastructure cabling, equipment and integration, wireless classroom integration/installation, retrofit and data and voice cabling, and internet video instruction servers (IVIS). Only the Purchase and Install phase appears in the Report since technology projects do not involve scope, design and construction. For schedule information, actual start and end dates are provided and planned completion dates are provided. For financial data, the funding is on a lump sum basis and the costs per school are dependent on survey results. Each CP reflects funding for an entire multi-school program. There are two CPs of \$97.86 million and \$10.0 million. This program has additional State, Federal and private funding sources which are not included in this column. Final estimates and actual spending are provided when available. Financial data is "DIIT", if data is not provided.

<p>Redesigning the network by engineers due to a discontinued key component of the school infrastructure resulted in additional construction time.</p> <p><b>Category Note:</b> DIIT (DOE Division of Instructional and Information Technology) - Project Connect involves purchase and installation of technology on projects such as infrastructure cabling, equipment and integration, wireless classroom integration/installation, retrofit and data and voice cabling, and internet video instruction servers (IVIS). Only the Purchase and Install phase appears in the Report since technology projects do not involve scope, design and construction. For schedule information, actual start and end dates are provided and planned completion dates are provided. For financial data, the funding is on a lump sum basis and the costs per school are dependent on survey results. Each CP reflects funding for an entire multi-school program. There are two CPs of \$97.86 million and \$10.0 million. This program has additional State, Federal and private funding sources which are not included in this column. Final estimates and actual spending are provided when available. Financial data is "DIIT", if data is not provided.</p>												

FOOTNOTES: PNS - Phase Not Started. Planned end dates are developed and entered when the phase starts. PNB - Project Not Budgeted. Budgets are developed during Scope and Design phases.

Redesigning the network by engineers due to a discontinued key component of the school infrastructure resulted in additional construction time.												
<b>Category Note:</b> DIIT (DOE Division of Instructional and Information Technology) - Project Connect involves purchase and installation of technology on projects such as infrastructure cabling, equipment and integration, wireless classroom integration/installation, retrofit and data and voice cabling, and internet video instruction servers (IVIS). Only the Purchase and Install phase appears in the Report since technology projects do not involve scope, design and construction. For schedule information, actual start and end dates are provided and planned completion dates are provided. For financial data, the funding is on a lump sum basis and the costs per school are dependent on survey results. Each CP reflects funding for an entire multi-school program. There are two CPs of \$97.86 million and \$10.0 million. This program has additional State, Federal and private funding sources which are not included in this column. Final estimates and actual spending are provided when available. Financial data is "DIIT", if data is not provided.

Redesigning the network by engineers due to a discontinued key component of the school infrastructure resulted in additional construction time.						\$97,857,026						DIIT
<b>Category Note:</b>												
DIIT (DOE Division of Instructional and Information Technology) - Project Connect involves purchase and installation of technology on projects such as infrastructure cabling, equipment and integration, wireless classroom integration/installation, retrofit and data and voice cabling, and internet video instruction servers (IVIS). Only the Purchase and Install phase appears in the Report since technology projects do not involve scope, design and construction. For schedule information, actual start and end dates are provided and planned completion dates are provided. For financial data, the funding is on a lump sum basis and the costs per school are dependent on survey results. Each CP reflects funding for an entire multi-school program. There are two CPs of \$97.86 million and \$10.0 million. This program has additional State, Federal and private funding sources which are not included in this column. Final estimates and actual spending are provided when available. Financial data is "DIIT", if data is not provided.

Redesigning the network by engineers due to a discontinued key component of the school infrastructure resulted in additional construction time.														
<b>Category Note:</b>														
DIIT (DOE Division of Instructional and Information Technology) - Project Connect involves purchase and installation of technology on projects such as infrastructure cabling, equipment and integration, wireless classroom integration/installation, retrofit and data and voice cabling, and internet video instruction servers (IVIS). Only the Purchase and Install phase appears in the Report since technology projects do not involve scope, design and construction. For schedule information, actual start and end dates are provided and planned completion dates are provided. For financial data, the funding is on a lump sum basis and the costs per school are dependent on survey results. Each CP reflects funding for an entire multi-school program. There are two CPs of \$97.86 million and \$10.0 million. This program has additional State, Federal and private funding sources which are not included in this column. Final estimates and actual spending are provided when available. Financial data is "DIIT", if data is not provided.

Redesigning the network by engineers due to a discontinued key component of the school infrastructure resulted in additional construction time.												
<b>Category Note:</b> DIIT (DOE Division of Instructional and Information Technology) - Project Connect involves purchase and installation of technology on projects such as infrastructure cabling, equipment and integration, wireless classroom integration/installation, retrofit and data and voice cabling, and internet video instruction servers (IVIS). Only the Purchase and Install phase appears in the Report since technology projects do not involve scope, design and construction. For schedule information, actual start and end dates are provided and planned completion dates are provided. For financial data, the funding is on a lump sum basis and the costs per school are dependent on survey results. Each CP reflects funding for an entire multi-school program. There are two CPs of \$97.86 million and \$10.0 million. This program has additional State, Federal and private funding sources which are not included in this column. Final estimates and actual spending are provided when available. Financial data is "DIIT", if data is not provided.

Redesigning the network by engineers due to a discontinued key component of the school infrastructure resulted in additional construction time.							\$97,857,026						
<b>Category Note:</b>							DIIT (DOE Division of Instructional and Information Technology) - Project Connect involves purchase and installation of technology on projects such as infrastructure cabling, equipment and integration, wireless classroom integration/installation, retrofit and data and voice cabling, and internet video instruction servers (IVIS). Only the Purchase and Install phase appears in the Report since technology projects do not involve scope, design and construction. For schedule information, actual start and end dates are provided and planned completion dates are provided. For financial data, the funding is on a lump sum basis and the costs per school are dependent on survey results. Each CP reflects funding for an entire multi-school program. There are two CPs of \$97.86 million and \$10.0 million. This program has additional State, Federal and private funding sources which are not included in this column. Final estimates and actual spending are provided when available. Financial data is "DIIT", if data is not provided.

<b>Explanations:</b>						<b>OMB CP Authorized Amount</b>	\$4,000,000	<b>\$ Variance, Project Budget to Final Estimate</b>		DOEL	<b>% Final Estimate Amount to Project Budget Under/( Over)</b>	DOEL
<b>Category Note:</b> DOEL - DOE Lead - Performs Lead Paint Abatement. For schedule data, construction actual start and end dates are provided. Planned construction completion dates are "DOEL". Scope and Design are not required. Accordingly, the phase provided is construction. There are two CPs for these projects, based on a combined amount of \$4.0 million. Project budget data is "DOEL" since the funding is lump sum. The final estimate and total actual spending are provided.

Redesigning the network by engineers due to a discontinued key component of the school infrastructure resulted in additional construction time.													
<b>Category Note:</b>													
DIIT (DOE Division of Instructional and Information Technology) - Project Connect involves purchase and installation of technology on projects such as infrastructure cabling, equipment and integration, wireless classroom integration/installation, retrofit and data and voice cabling, and internet video instruction servers (IVIS). Only the Purchase and Install phase appears in the Report since technology projects do not involve scope, design and construction. For schedule information, actual start and end dates are provided and planned completion dates are provided. For financial data, the funding is on a lump sum basis and the costs per school are dependent on survey results. Each CP reflects funding for an entire multi-school program. There are two CPs of \$97.86 million and \$10.0 million. This program has additional State, Federal and private funding sources which are not included in this column. Final estimates and actual spending are provided when available. Financial data is "DIIT", if data is not provided.

<b>Explanations:</b>						<b>OMB CP Authorized Amount</b>	\$3,863	<b>\$ Variance, Project Budget to Final Estimate</b>	IEH	<b>% Final Estimate Amount to Project Budget Under/( Over)</b>	IEH	
<b>Category Note:</b> IEH (Industrial & Environmental Hygiene) - These projects are environmental abatement projects performed on an as-needed basis. The work items are typically in response to requests by custodians. For IEH schedule data, the actual construction start date and completion dates are provided. Like Emergency projects, these projects are responses to identified environmental conditions and do not have formal scope and design phases. The only phase reported is Construction. For IEH financial data, CP and final estimate data are provided. Project budget data is "IEH" as these projects, like Emergency projects, are responses to environmental conditions and are funded as needed.												
K239	I.S. 239 - BROOKLYN	Fast Track Projects	EMERGENCY PROTECTIVE MEASURES - HURRICANE SANDY	Construction	Complete	10/31/2012	FTK	05/18/2015	FTK	FTK	\$2,034,714	\$2,025,667

<b>Category Note:</b> Fast Track (Various Expedited Projects) - These projects are expedited when identified. In some cases there may not be a formal scope or design phase. Accordingly, the only phase reported is Construction. The actual construction start and end dates are provided. The planned construction completion date is "FTK" since these projects are expedited and do not have standard scheduled durations. Financial information includes the CP, final estimate, and actual spending. The final estimate does not include projections to complete the project. Project budget is "FTK" since the projects are expedited and are not budgeted.

<p>IEH (Industrial &amp; Environmental Hygiene) - These projects are environmental abatement projects performed on an as-needed basis. The work items are typically in response to requests by custodians. For IEH schedule data, the actual construction start date and completion dates are provided. Like Emergency projects, these projects are responses to identified environmental conditions and do not have formal scope and design phases. The only phase reported is Construction. For IEH financial data, CP and final estimate data are provided. Project budget data is "IEH" as these projects, like Emergency projects, are responses to environmental conditions and are funded as needed.</p>														

FOOTNOTES: PNS - Phase Not Started. Planned end dates are developed and entered when the phase starts. PNB - Project Not Budgeted. Budgets are developed during Scope and Design phases.

Redesigning the network by engineers due to a discontinued key component of the school infrastructure resulted in additional construction time.												
<b>Category Note:</b> DIIT (DOE Division of Instructional and Information Technology) - Project Connect involves purchase and installation of technology on projects such as infrastructure cabling, equipment and integration, wireless classroom integration/installation, retrofit and data and voice cabling, and internet video instruction servers (IVIS). Only the Purchase and Install phase appears in the Report since technology projects do not involve scope, design and construction. For schedule information, actual start and end dates are provided and planned completion dates are provided. For financial data, the funding is on a lump sum basis and the costs per school are dependent on survey results. Each CP reflects funding for an entire multi-school program. There are two CPs of \$97.86 million and \$10.0 million. This program has additional State, Federal and private funding sources which are not included in this column. Final estimates and actual spending are provided when available. Financial data is "DIIT", if data is not provided.

Redesigning the network by engineers due to a discontinued key component of the school infrastructure resulted in additional construction time.												
<b>Category Note:</b> DIIT (DOE Division of Instructional and Information Technology) - Project Connect involves purchase and installation of technology on projects such as infrastructure cabling, equipment and integration, wireless classroom integration/installation, retrofit and data and voice cabling, and internet video instruction servers (IVIS). Only the Purchase and Install phase appears in the Report since technology projects do not involve scope, design and construction. For schedule information, actual start and end dates are provided and planned completion dates are provided. For financial data, the funding is on a lump sum basis and the costs per school are dependent on survey results. Each CP reflects funding for an entire multi-school program. There are two CPs of \$97.86 million and \$10.0 million. This program has additional State, Federal and private funding sources which are not included in this column. Final estimates and actual spending are provided when available. Financial data is "DIIT", if data is not provided.

Redesigning the network by engineers due to a discontinued key component of the school infrastructure resulted in additional construction time.													
<b>Category Note:</b> DIIT (DOE Division of Instructional and Information Technology) - Project Connect involves purchase and installation of technology on projects such as infrastructure cabling, equipment and integration, wireless classroom integration/installation, retrofit and data and voice cabling, and internet video instruction servers (IVIS). Only the Purchase and Install phase appears in the Report since technology projects do not involve scope, design and construction. For schedule information, actual start and end dates are provided and planned completion dates are provided. For financial data, the funding is on a lump sum basis and the costs per school are dependent on survey results. Each CP reflects funding for an entire multi-school program. There are two CPs of \$97.86 million and \$10.0 million. This program has additional State, Federal and private funding sources which are not included in this column. Final estimates and actual spending are provided when available. Financial data is "DIIT", if data is not provided.

Like Emergency projects, these projects are responses to identified environmental conditions and do not have formal scope and design phases. The only phase reported is Construction. For IEH financial data, CP and final estimate data are provided. Project budget data is "IEH" as these projects, like Emergency projects, are responses to environmental conditions and are funded as needed.

<b>Category Note:</b> IEH (Industrial & Environmental Hygiene ) - These projects are environmental abatement projects performed on an as-needed basis. The work items are typically in response to requests by custodians. For IEH schedule data, the actual construction start date and completion dates are provided. Like Emergency projects, these projects are responses to identified environmental conditions and do not have formal scope and design phases. The only phase reported is Construction. For IEH financial data, CP and final estimate data are provided. Project budget data is "IEH" as these projects, like Emergency projects, are responses to environmental conditions and are funded as needed.
