2. The video surveillance cameras shall be sufficiently light sensitive and provide sufficient image resolution (supported by additional lighting if necessary) to produce easily discernible images recorded at all times;

3. The video surveillance cameras shall record at a minimum speed of [fifteen] 15 frames per second;

4. The video surveillance camera images shall be capable of being viewed through use of appropriate technology, including but not limited to, a computer screen or closed circuit television monitor;

5. The video surveillance camera or the system affiliated with such camera shall be capable of transferring the recorded images to a portable form of media, including but not limited to, compact disc, digital video disc, universal serial bus, secure digital card, or portable hard drive;
