A Local Law in relation to establishing an electric vehicle charging station pilot program

Be it enacted by the Council as follows:

Section 1. Electric vehicle charging station pilot program. a. The city shall establish a pilot program to install electric vehicle charging stations. As part of such program, no later than March 1, 2018, 25 publicly accessible electric vehicle charging stations shall be installed in the city, provided that at least two such electric vehicle charging stations shall be installed in each of the city's five boroughs. The department of transportation shall post the location of such electric vehicle charging stations on its website.

b. Commencing in 2018, the advisory committee established pursuant to section 19-101.5 of the code shall include within its annual recommendations pursuant to such section information regarding the pilot program established pursuant to this local law, including, to the extent such information is available, the cost of such pilot program, the rate of utilization of each charging station installed pursuant to such pilot program, recommendations with respect to expanding or making such pilot program permanent, and any other recommendations regarding such pilot program or the installation of electric vehicle charging stations in the city, including the feasibility of on-street electric vehicle charging. Notwithstanding any inconsistent provision of law, following the submission of such committee's recommendations in 2019, and on or before March 1, 2020, such committee shall post online and provide to the speaker of the council a written report on the impact of such pilot program, including any recommendations regarding the installation of electric vehicle charging stations in the city.

c. Such pilot program shall cease to exist on March 1, 2020.

§ 2. This local law takes effect immediately.
