File #: Res 1223-2008, Version: A

Whereas, There is concern that air pollution caused by gasoline combustion engine emissions creates

risks to our health, the health of our children, future generations and the welfare of our environment and

ecological system; and

Whereas, Hydrogen fuel cell vehicles, which create electricity using a chemical reaction involving

hydrogen and oxygen, are zero emissions vehicles; and

Whereas, General Motors, Toyota Motor Company and Honda currently have approximately two

hundred demonstration vehicles powered by hydrogen fuel cells being driven in California, Washington, D.C.

and New York, in Westchester County; and

Whereas, Chevrolet has begun public test drives of one hundred hydrogen-fueled sport utility vehicles,

according to information located on the General Motors website on April 24, 2009; and

Whereas, The use of hydrogen fuel cell vehicles would help to wean the United States off dependence

on expensive and dwindling foreign oil, which contributes to pollution; now, therefore, be it

Resolved, That the Council of the City of New York calls upon the United States Congress to fully

explore adopting legislation and/or regulatory measures to incentivize the immediate marketing and use of

hydrogen fuel cell vehicles, to develop the re-fueling infrastructure to support these vehicles and to consider

making the manufacture and importation of gasoline combustion vehicles unlawful by a date certain; and

further calls upon the city of New York to take steps to advance the use of hydrogen fuel cell technology and to

find ways to promote New York City as an economic center for hydrogen fuel cell technology.
