Int. No. 236

By Council Member Kallos

A Local Law in relation to implementing a pilot project to reduce the number of crashes involving city owned motor vehicles

Be it enacted by the Council as follows:

Section 1. a. Definitions. For the purposes of this section, the term “collision avoidance technology” means any system in vehicles intended to alert drivers of pedestrians, cyclists, or other vehicles, including but not limited to autonomous emergency braking, forward collision warning, and camera systems intended to warn drivers of oncoming pedestrians and cyclists.

b. Collision avoidance technology pilot program. The department of citywide administrative services shall implement a pilot program requiring the use of collision avoidance technology in vehicles owned by a city agency. No more than six months following the effective date of the local law that added this section, the department of citywide administrative services shall ensure that no less than 100 vehicles owned by a city agency shall be utilizing collision avoidance technology. Such vehicles may include existing vehicles owned by city agencies that have been retrofitted with such technology or new vehicles purchased with such technology. The pilot program shall last for one year. No later than six months following the conclusion of the pilot program, the department of citywide administrative services shall submit a report to the mayor, public advocate, comptroller, and the speaker of the city council which shall include but not be limited to the cost of collision avoidance technology, the impact of such technology on the incidence of vehicle accidents, including a comparison to the incidence of vehicle accidents among city owned vehicles without such technology, and

recommendations for expanding the use of any such technology.

§ 2. This local law takes effect immediately.
