RESOLUTION AMENDING AND RESTATING THE RESOLUTION COMPUTING AND CERTIFYING ADJUSTED BASE PROPORTION OF EACH CLASS OF REAL PROPERTY FOR FISCAL 2001 TO THE STATE BOARD OF REAL PROPERTY SERVICES PURSUANT TO SECTION 1803-a, REAL PROPERTY TAX LAW

Introduction. The above-captioned resolution completes the certification procedure required by Section 1803-a, Real Property Tax Law, to establish the class shares used in levying the real property taxes for the adopted Fiscal 2001 budget.

On June 6, 2000, the Council adopted a resolution computing and certifying the current base proportions for Fiscal 2001 (the "CBP Resolution"). After the adoption of the CBP Resolution, Section 1803-a, Real Property Tax Law, was amended to lower the percent of increase in the current base proportion as compared with the previous year?s adjusted base proportion from 5.0 percent to 2.0 percent, which altered the calculations contained in the CBP Resolution. Pursuant to this amendment to state law, the Council adopted a resolution on September 13, 2000 restating the CBP Resolution. On June 6, 2000, the Council also adopted a resolution computing and certifying the adjusted base proportion of each class of real property for Fiscal 2001 (the ?ABP Resolution?). The above-captioned resolution amends and restates the ABP Resolution to reflect the changes in the September 13, 2000 CBP Resolution.

The current base proportion for each class of real property takes into account the market value changes in the class occurring between the assessment roll for the base period, 1989, and the latest roll for which the State Board of Real Property Services (?SBRPS?) has established class equalization rates, 1999. The CBP Resolution modified the class shares for the Fiscal 2001 property tax levy accordingly. The remaining step, to be taken in the above-captioned resolution, adjusts these current base proportions to take account of the various physical changes (such as demolitions, new construction, changes in exempt status and transfers among classes) which are reflected in the new final assessment roll. The computations called for in the SBRPS procedure are designed to separate the effects of these physical changes from equalization changes made by local assessors.
